Progetto AR.TU
design PERIN & TOPAN

Collezione di scrivanie, librerie, madie, cassettiere e tavoli riunione che consente la definizione completa di un ambiente direzionale caratterizzato da linee strutturali e volumi definiti, valorizzati da accostamenti materici e cromatici.

SCRIVANIE

Le scrivanie hanno struttura costituita da pannelli in agglomerato ligneo dello spessore di 50 mm, in particolare il piano di lavoro è costruito in tamburato con inserimento di opportuni rinforzi metallici e spessori atti alle diverse finiture del piano. Le finiture superficiali sono:

- impiallacciatura in essenza di vero legno a scelta fra rovere cotto, noce canaleto, rovere naturale (per piani e fianchi).
- laccatura opaca o lucida nei colori bianco, tortora e titanio (per piani laterali, frontali e fianchi).
- rivestimento in eco-pelle nei colori bianco, tortora e titanio (piani lato operatore e top access).

I piani di lavoro delle scrivanie sono realizzati con superficie intera in legno; con interposizione di formelle rivestite in eco-pelle, oppure in laccato opaco con interposta formella in eco-pelle. Tutti i piani sono completi di top access integrato con sportello rivestito in eco-pelle e relativa vasca di contenimento sottopiano. La salita cavi è prevista a richiesta tramite una canalina verniciata fissata sottopiano, raccordata da canalina a 3 vie alla vasca di contenimento.

I fianchi laterali sono aggregati strutturalmente ai piani e sono dotati di piedini micro-regolabili. Completa la scrivania il piano frontale con fianchi aggregati da giunzione a 45°; unisce piani e fianchi una lama continua in metallo a forte spessore 8 mm in finitura cromo-satinato.

Le scrivanie sono disponibili in 4 configurazioni:

- Scrivanie indipendenti.
- Scrivanie a sbalzo in appoggio su consolle.
- Scrivanie a sbalzo in appoggio su dattilo dotato di muretto con accessibilità superiore.
- Scrivanie a sbalzo in appoggio su mobile di servizio.

Tutte le scrivanie a sbalzo sono in appoggio ai piani laterali attraverso un supporto metallico rettangolare rivestito in eco-pelle.

La consolle a ponte è coordinata nelle finiture lignee alla scrivania, ed è costituita da pannelli di spessore 50 mm, caratterizzati dalla giunzione a 45°, piano e fianco e dalla lama cromo-satinata che percorre il piano di lavoro nella sua lunghezza.

Il muretto, finitura laccata opaca, ha integrato il piano dattilo spessore 50 mm in finitura lignea, la gonnola frontale è laccata opaca, con antina superiore di accesso rivestita in eco-pelle, dotata di fessura laterale per passaggio cavi, due passacavi laterali cromati e cerniere rallentate.

Il mobile di servizio è disponibile sia come elemento di supporto alle scrivanie a sbalzo, sia

come elemento di arredo indipendente. E' configurabile a scelta con ante o cassetti, le finiture sono sia lignee che laccato lucido, mentre la scocca interna è in melaminico color tortora. Fa da supporto uno zoccolo a tre lame verticali alte 100 mm, verniciate a polveri epossidiche nei colori bianco o antracite, complete di piedini micro-regolabili.

MADIE E LIBRERIE

I contenitori sono caratterizzati da finiture coordinate alle scrivanie, possono essere dotati di nicchie ad incasso laccate lucide in vivaci colori di spessore 10 mm, accessoriabili a richiesta con faretti a led azionabili tramite interruttore a sfioro.

Le ante, i fianchi esterni e top (previsto fino altezza 1720 mm) sono in finitura lignea e laccato lucido, mentre la struttura interna ed i ripiani sono in melaminico color tortora. La serratura è su richiesta. I contenitori poggiano su zoccolo metallico a lame verticali alte 100 mm, verniciate a polveri epossidiche nei colori bianco o antracite, completi di piedini micro-regolabili.

Le madie sono un elemento ad altezza scrivania con configurazione a 4 cassetti, oppure a 2 cassetti con nicchia centrale laccata lucida e ante nella parte inferiore. I cassetti in legno sono dotati di guide a rientro controllato. Poggiano su piedini fissi alti 17 mm. Possono su richiesta essere montate le serrature solo sulle ante.

CASSETTIERE

Le cassettiere sono caratterizzate dalla continuità di finitura tra frontali cassetto, top e schiena sono forniti sia in finitura lignea che laccata lucida, mentre i fianchi sono sempre verniciati in finitura opaca; dispongono di tre cassetti in legno con presa laterale a 45° per l'apertura e guide a rientro controllato e dotate di serratura multipla. Sono montate su 4 ruote, di cui 2 dotate di freno.

TAVOLI RIUNIONE

I piani rettangolari in diverse dimensioni sono caratterizzati da una lama in metallo in finitura cromo-satinata, coordinata al piano delle scrivanie, che percorre l'intera lunghezza del piano stesso dividendolo a metà. Dotati sempre di sportellino top access in metallo rivestito in eco-pelle. I piani hanno spessore 50 mm sono disponibili in finitura lignea; oppure in alternativa con le teste in finitura lignea o laccata, interposta nella zona centrale da formelle rivestite in eco-pelle, abbinata al top access. Le gambe hanno forma di parallelepipedo, laccato color titanio lucido o bianco e complete di passacavi laterali cromati. Sul fondo delle gambe è previsto un foro di accesso per i cavi a pavimento che si integra alle canalizzazioni del top access.

AR.TU collection
design PERIN & TOPAN

A range of desks, bookcases, credenza, meeting tables and pedestals that allows the definition of an executive environment, characterized by structural lines and defined volumes, embellished with combinations of materials and colors.

DESKS

The desks have a structure made from veneer panels with a thickness of 50 mm, in particular the work top has a metal reinforcements made for the different finishes.

These are:

- veneer veneer, the choice is between cooked oak, American walnut, natural oak (for tops and sides).
- matte or glossy lacquer colors white, gray and titanium (for side worktops, front and sides).
- coating eco-leather in white, dove gray and titanium (working top on the operator side and top access).

The work tops of the desks are made of veneer, made by leaves covered in eco-leather, matt lacquered.

All work tops are complete with built-top access door covered in eco-leather and its cable tray. The cables risers is given on request and made by a varnished box fixed under the work top, hooked up to a 3-way conduit for the tray cables.

The side panels are aggregated to the work top and equipped with adjustable feet.

The desk is complemented by a front panel with sides aggregates at 45° to the work top and the sides are joined by a metal blade thickness 8 mm in satin chrome finish .

The desks are available in 4 configurations:

- Independent desks.
- Desks supported by extension.
- Desks supported by console with top access panel.
- Desks supported by container.

All desks are supported by work tops through a metal rectangle upholstered in eco-leather.

The extension is in veneer finishes as the desk, and is made up of panels of 50 mm thick, 45 °, worktop and side are united by the metal blade that runs through the work top.

The panel, in matt lacquer, attacked the work top are 50 mm thick veneer, matt lacquered front panel, with top access eco-leather, with side slit for the passage of cables, two chrome connector side hinges with soft closing.

The service container is available is as an element of support for desks, it is also independent element. It can be with either doors or drawers, the finish is either veneer or lacquer finish, while the inner shell is in dove-

Collection AR.TU
design PERIN & TOPAN

gray melamine. A plinth with three vertical blades 100 mm high acts as a support, epoxy powder coated in white or anthracite, with adjustable feet.

LOW CREDENZAS AND LIBRARIES

The containers are characterized by finishing as the desks, they can have recesses 10 mm thick glossy lacquered in bright colors, a request may have led spotlights that illuminate the touch of a switch.

Doors, sides and top (maximum height 1720 mm) is made of veneer and lacquered, while the internal structure is in melamine dove-gray. The lock is on demand. The containers rest on a metal base with vertical blades 100 mm high, epoxy powder coated in white or anthracite, with adjustable feet.

The low sideboards are an element that has the same height as the desk with 4 drawers or 2 drawers with central niche and glossy lacquered doors at the bottom. The veneer drawers are equipped with guides with controlled re-entry and rest on fixed feet tall 17 mm. At request can be mounted locks only on the doors.

DRAWER

The drawers have drawer fronts, top and back with the same finish veneer or gloss lacquer, while the sides are always painted opaque, have three veneer drawers with side-to 45 ° for the opening and guides to controlled re-entry and a locking strip. They are mounted on 4 wheels, 2 with brake.

MEETING TABLES

The worktops in different sizes have a rectangular metal blade in satin-finish chrome, as the working top of the desks, which runs the entire length dividing it in half. Equipped always top access in metal covered with eco-leather. The worktops are 50mm thick are available in veneer, or with heads made of veneer or lacquered finish, third in the central area with panels covered in eco-leather, combined with top access. The legs are shaped as parallelepiped, lacquered in glossy titanium or white with polished chrome side grommets. On the bottom of the legs there is an access hole for the cables that reaches the floor ducts up to the top access.

Collection de bureaux, bibliothèques, bahuts, caissons et tables de réunion qui permet la définition d'un environnement de direction, caractérisé par des lignes structurelles et par des volumes définis, améliorés par des combinaisons de matériaux et de couleurs.

BUREAUX

Les bureaux ont une structure faite de panneaux de bois d'une épaisseur de 50 mm, en particulier le plateau de travail a des renforts métalliques appropriés pour les différentes finitions du plateau de travail. Les finitions sont:

- Les placages en bois véritable, le choix est entre le chêne fumé, le noyer américain (Canaletto) et le chêne naturel (pour les plateaux et les côtés).
- Laqué mat ou brillant en couleur blanc, gris tourterelle ou titane (pour les plateaux de travail latéraux côté de l'opérateur, la partie visiteur et les côtés).
- Couverture en éco cuir en blanc, gris tourterelle ou titane (plateaux de travail côté de l'opérateur et top access).

Les plateaux de travail des bureaux peuvent être tous en bois, en bois et éco cuir ou en laqué mat avec partie centrale recouverte en éco cuir.

Tous les plateaux de travail sont complétés par un top access intégré couvert de éco cuir avec son plateau porte-câbles au dessous du plateau. La montée des câbles est prévue comme option avec une petite poutre verni à fixer sous le plan de travail. Elle est reliée au plateau porte-câbles par un petit canal à 3 voies.

Les côtés latéraux sont agrégés structurellement aux plateaux de travail et sont équipées avec de petits pieds réglables.

Le bureau est complété par la partie frontale qui est reliée aux côtés à 45° par une lame de métal de 8 mm d'épaisseur en finition chromé satiné.

Les bureaux sont disponibles en 4 configurations:

- Bureaux indépendants.
- Bureaux en appui sur la console.
- Bureaux en appui sur retour avec muret avec top access supérieur.
- Bureaux en appui sur meuble de service.

Tous les bureaux en appui sont reliés aux retours ou aux meubles de service par un support métallique de forme rectangulaire couvert de éco cuir.

Les murets frontaux et latéraux sont toujours en finition laqué mat. Ils soutiennent le plateau du retour, toujours en bois de 50 mm d'épaisseur. Le muret latéral a un top access avec petite porte supérieure couverte en éco cuir, avec fente latérale pour le passage de câbles, des charnières à fermeture douce et deux obturateurs latéraux chromés.

Le meuble de service est disponible soit comme élément de support pour les bureaux, soit comme élément indépendant. Il est configurable avec portes ou avec tiroirs. Les finitions sont le bois ou le laqué brillant pour la partie extérieure et mélaminé gris tourterelle pour la partie intérieure. Le socle est composé par trois lames verticales de 100 mm de hauteur en couleur blanc ou anthracite, avec des petits pieds réglables.

BAHUTS ET BIBLIOTHEQUES

Les armoires sont caractérisées par des finitions coordonnées aux bureaux. Elles peuvent être équipées avec des niches encastrées en finition laqué brillant en couleurs vives. Disponible sur demande il y a l'éclairage avec LED qui s'allume en touchant un interrupteur.

Les portes, les côtés et le dessus (disponible jusqu'à hauteur 1720 mm) sont en finition bois ou laqué brillant. La structure interne et les étagères sont toujours en mélaminé gris tourterelle. Les serrures sont fournies uniquement sur demande. Les armoires ont un socle en métal composé par des lames verticales de 100 mm de hauteur, en couleur blanc ou anthracite, avec des petits pieds réglables.

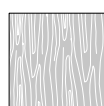

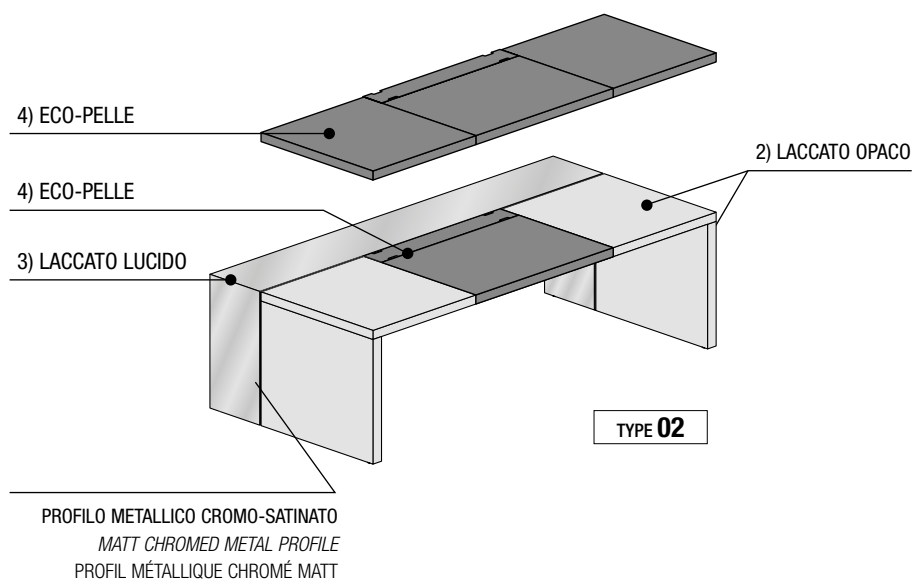

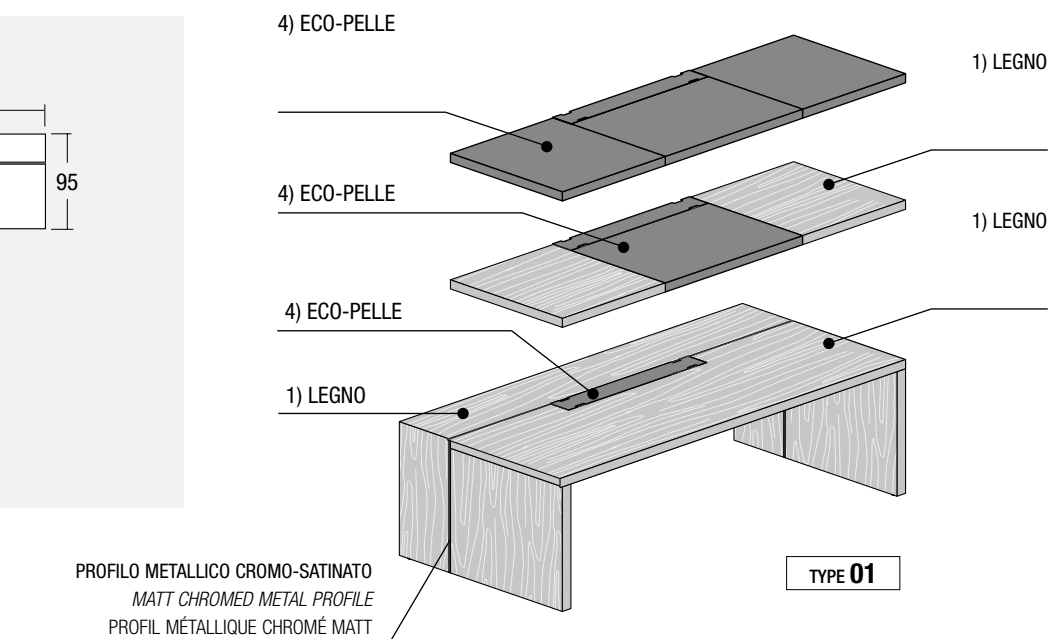

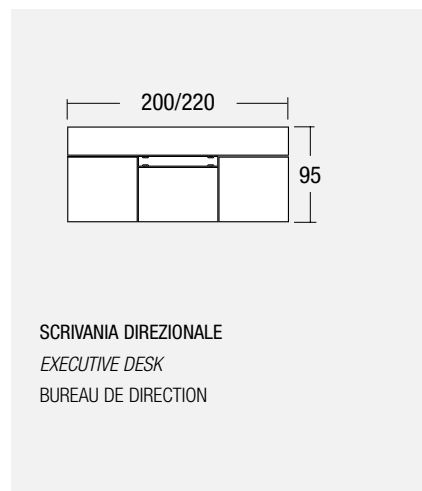

Les bahuts ont la même hauteur que les bureaux, avec 4 tiroirs ou avec 2 tiroirs et niche centrale en laqué brillant et portes dans la partie inférieure. Les tiroirs en bois sont équipés avec des guides à rentrée contrôlée. Ils ont des petits pieds fixes de 17 mm de hauteur. Les serrures sont seulement sur demande et uniquement sur les portes.

CAISSONS

Les caissons ont les façades de tiroirs, le top et le dos en finition bois ou en laqué brillant. Les côtés sont toujours en finition laqué mat. Ils ont trois tiroirs en bois avec découpe latérale à 45° pour l'ouverture, les guides pour la rentrée contrôlée des tiroirs et la serrure. Ils sont montés sur 4 roues, dont 2 avec freins.

TABLES DE REUNION

Les plateaux rectangulaires de différentes tailles sont caractérisés par une lame métallique en finition chromé satiné, coordonnée aux plateaux des bureaux, qui s'étend sur toute la longueur du plan en le divisant en deux. Ils sont équipés toujours d'un top access recouvert en éco cuir. Les plateaux ont une épaisseur de 50 mm et ils sont disponibles en finition bois ou avec les deux extrémités en finition bois ou laqué et les plateaux centraux couverts en éco cuir, combinés avec le top access. Les piétements sont en forme de parallélépipède, en laqué brillant titane ou blanc avec un obturateur chromé. Sur la partie inférieure des pieds est prévu un trou pour l'accès des câbles qui viennent du sol.

FATTORE ALPHA design ambostudio - Grazia Azzolin

Sistema di tavoli da lavoro, scrittoi direzionali e tavoli riunione che consente di integrare diverse funzioni ed organizzazioni di lavoro attraverso l'utilizzo di molteplici materiali, finiture e attrezzature.

E' strutturato con un telaio perimetrale in estruso di alluminio che riceve ad incasso i piani di lavoro. Il telaio si integra ad incastro sugli angoli con i supporti verticali a sezione quadra, anch'essi in estruso di alluminio accoppiato con sistema ad incastro mediato da elementi in pet.

Alla base dei supporti verticali un piedino in pmma trasparente ha funzione strutturale e di microregolazione del tavolo.

Le attrezzature per la composizione dei tavoli e per il completamento funzionale si aggregano al telaio perimetrale attraverso fissaggi scorrevoli su un binario ricavato all'interno del telaio stesso.

I piani dello spessore di mm 18 vengono incassati all'interno del telaio perimetrale con un doppio vantaggio:

- un appoggio perimetrale della larghezza di mm 47 che garantisce una tenuta strutturale superiore a quella propria del piano stesso;
- un bordo perimetrale in alluminio dello spessore di mm 3 che protegge il bordo del piano, in particolare i suoi spigoli arrotondati, dagli urti con oggetti contundenti di maggior durezza garantendo una migliore integrità nel tempo.

I piani in agglomerato di legno, sono fornibili con finiture superficiali in nobilitato melaminico di diversi colori o impiallacciati in essenze di legni di coltura.

I piani con superficie in vetro sono dei piani composti con stratificazione superiore in vetro temprato dello spessore di mm 8 retro smaltato in diversi colori.

I piani dei tavoli da lavoro, scrittoi direzionali e tavoli riunione possono essere integrati con top-access in alluminio estruso al fine di agevolare un completo cablaggio degli stessi e delle attrezzature di lavoro.

Completano il sistema gli screen di separazione in vetro acidato, in tessuto fonoassorbente e in nobilitato melaminico di diversi colori supportati da un profilo strutturale in alluminio estruso.

I profili laterali sono pezzi continui fino ai 240 cm, oltre quella misura vengono consegnate due barre giuntate.

FATTORE ALPHA design ambostudio - Grazia Azzolin

An office, executive desks and meeting table system that perfectly integrate different work functions and organisations taking advantage of the many materials, finishes and equipment accessories.

It is constructed with a bearing frame in extruded aluminium that embeds the worktops.

The frame is jointed to PET corner blocks on the square legs, also in extruded aluminium.

The base of the legs have clear PMMA feet as structural supports and precision adjustment of the desk.

The accessory equipment for completing the desks and enhancing their functionalities are attached to the bearing frame by sliding attachments on a channel track integrated in the actual frame.

The 18 mm thick worktops are embedded in the bearing frame to offer a dual advantage:

- *the 47 mm wide support shelf guarantees greater strength than the worktop alone;*
- *a 3 mm thick aluminium trim protects the worktop edges, especially on its rounded corners, from scratching from harder objects thereby ensuring better long-term beauty.*

The worktops are in particleboard and can be supplied with finishes in different coloured melamine or wood veneer from planted forests.

The glass worktops are laminated with the upper layer in 8 mm thick tempered glass, the inner side is coated in various colours.

The worktops of the office and executive desks and the meeting tables can be fitted with top-access in extruded aluminium to offer full, easy cabling of the desk and other office equipment.

The system is completed by partition screens in acid etched glass, soundproof fabric and different coloured melamines supported by an extruded aluminium frame.

The side profiles are continuous pieces up to 240 cm, beyond that size two jointed bars are delivered.

FATTORE ALPHA design ambostudio - Grazia Azzolin

Système de tables de travail, de bureaux directionnels et de tables de réunion qui permet d'intégrer différentes fonctions et organisations de travail à travers l'utilisation de multiples matériaux, finitions et équipements.

Il se compose d'un châssis périmétral en aluminium extrudé qui s'encastre avec les plans de travail. Il s'emboîte aux angles par le biais de supports verticaux à section carrée, eux aussi en aluminium extrudé couplé à un système d'emboîtement régi par des éléments en téréphthalate de polyéthylène.

À la base des supports verticaux, un pied en PMMA transparent a une fonction à la fois structurale et de micro réglage de la table.

Les équipements pour la composition des tables et pour la disposition fonctionnelle s'intègrent au châssis périmétral par le biais de fixations qui coulissent dans une rainure située à l'intérieur du châssis même.

Les plans de 18 mm d'épaisseur s'emboîtent à l'intérieur du châssis périmétral avec un double avantage:

- un appui périmétral de la largeur de 47 mm qui garantit une tenue structurale supérieure à celle du plan même;
- un bord périmétral en aluminium de 3 mm d'épaisseur qui protège le bord du plan, notamment ses arrêtes arrondies, contre les chocs issus d'objets contondants durs, garantissant ainsi une meilleure intégrité dans le temps.

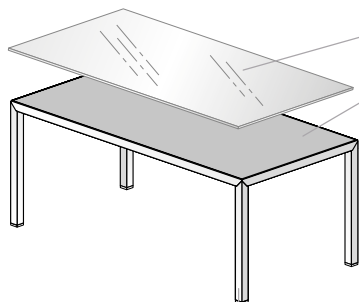

Les plans en aggloméré de bois peuvent être fournis avec leurs surfaces finies en revêtement anobli mélaminique de différentes couleurs ou plaquées en essences de bois de culture.

Les plans avec une surface en verre sont des plans composés d'une stratification supérieure en verre trempé d'une épaisseur de 8 mm rétro-émaillé dans différentes couleurs.

Les plans des tables de travail, les bureaux directionnels et les tables de réunion peuvent être intégrés avec un «top-access» en aluminium extrudé afin de faciliter un câblage complet de ces derniers et des équipements de travail.

Le système est complété par des écrans de séparation en verre acidé, en tissu acoustique et en revêtement anobli mélaminique de différentes couleurs, soutenus par un profil structural en aluminium extrudé.

Les profils latéraux sont des pièces continues jusqu'à 240 cm, au-delà de cette taille, deux barres jointives sont livrées.

Toki Cube Design Perin&Partners

Reception di concezione modulare consente di progettare lo spazio di accoglienza in modo fortemente personalizzato. Caratterizzata da una sovrapposizione di volumi dalle diverse dimensioni e da una composizione di superfici in diverse finiture, materiche e cromatiche.

La struttura a pannelli e piani di lavoro interno sono realizzati in agglomerati di legno di spessore mm.28. Sovrapposto alla struttura un'alzata caratterizzata da giunzioni dei pannelli a 45° all'interno della quale trovano spazio nicchie portaoggetti in metallo verniciato. Il piano interno ha profondità di cm 70 ed è corredato di una spazzolina per lo scorrimento dei cavi sul bordo frontale. Il piano ha uno smusso angolare che consente il passaggio dei cavi.

Modulo contenitore realizzato in agglomerato ligneo spessore mm 18 può ospitare al suo interno un frigorifero a vano superiore.

Tutte le composizioni possono essere integrate con piani colloquio con profondità 92,5 cm con possibilità di essere inseriti sia centralmente che lateralmente.

Tipologie:

Il bancone può presentare diverse configurazioni:

- 1) Lineare;
- 2) Lineare con alzata in oggetto laterale;
- 3) Lineare con alzata ad angolo;
- 4) Lineare con doppia alzata ad angolo
- 5) Composizione angolare

Toki Cube Design Perin&Partners

Modular concept reception allows you to design the meeting space in a highly personalized way. Characterized by overlapping volumes of different sizes and by a composition of surfaces in different finishes, materic and chromatic.

The panels structure and inner work tops are made of wood agglomerations of thickness 28 mm. Overlapped to the structure a raised lining made by a 45° panel junction, with painted metal storage niches. The inner top has a depth of 70 cm and is equipped with a brush for sliding the cables on the front edge. The top has an angular bevel allowing the passage of cables.

The container module made of 18 mm thick wood agglomerate can accommodate a mini fridge and an upper compartment.

All compositions can be integrated with meeting tops 92.5 cm in depth with the possibility to be inserted both centrally or sideways.

Types:

The reception counter can have different configurations:

- 1) Linear;
- 2) Linear with raised lining in lateral coupling;
- 3) Linear with raised lining at an angle ;
- 4) Linear with double raised lining at an angle
- 5) Angular Composition

Toki Cube Design Perin&Partners

La réception de conception modulaire vous permet de concevoir l'espace d'accueil de manière à ce que fortement personnalisé. Caractérisée par des volumes superposés de différentes dimensions et d'une composition de surfaces de différentes finitions, matériaux et chromatique.

La structure à panneaux et les plateaux de travail internes sont en bois aggloméré avec épaisseur de 28 mm. Superposé à la structure, une rehausse caractérisée par la jonction de panneaux à 45° à l'intérieur de laquelle sont placées des niches en métal verni. Le plateau de travail a une profondeur de 70 cm et il est équipé sur le bord frontal d'une brosse pour glisser les câbles. Le dessus a une découpe angulaire qui permet le passage des câbles.

Meuble retour en bois aggloméré de bois de 18 mm d'épaisseur peut loger à l'intérieur un mini frigo . Toutes les compositions peuvent être intégrées avec convivialités profondeur 92,5 cm avec possibilité d'être placées en position centrale ou latérale.

Types:

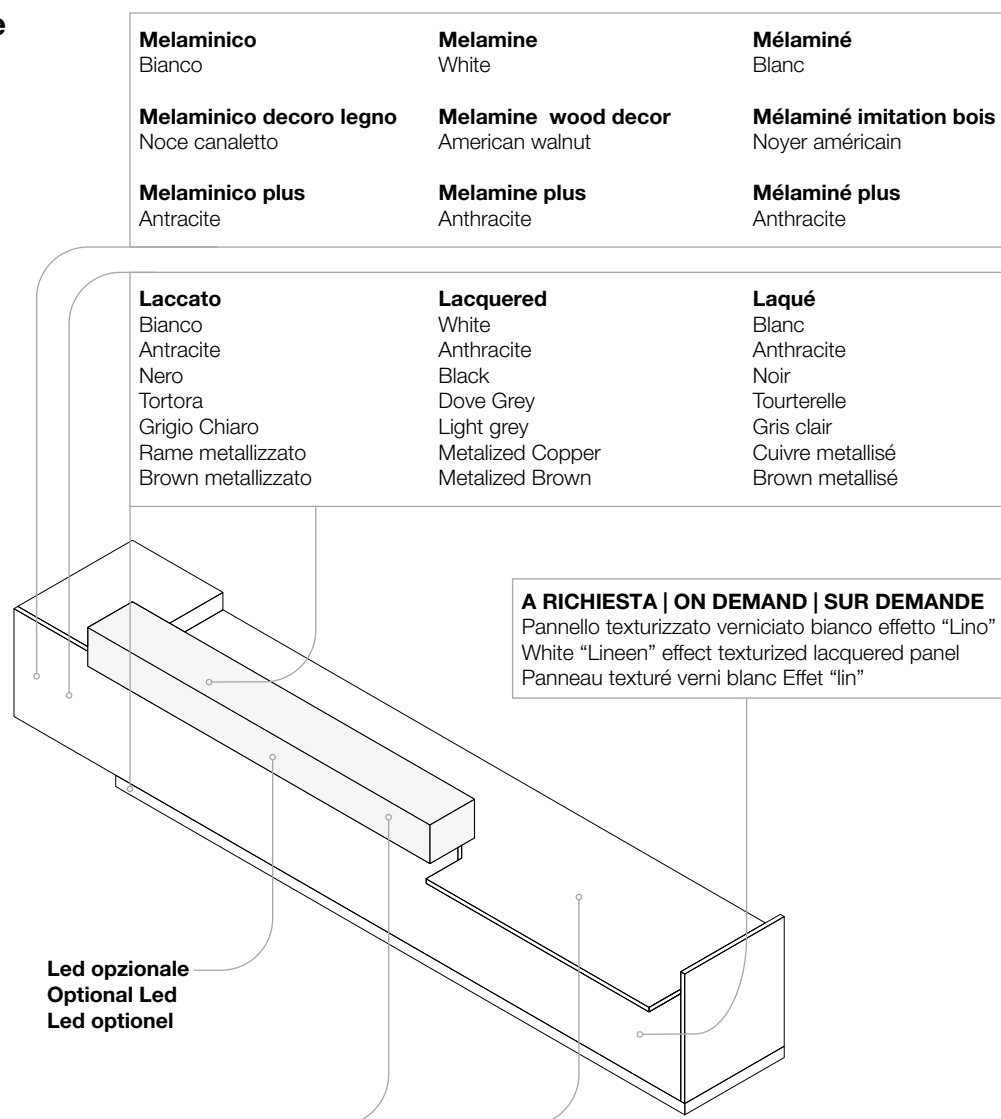

La banque accueil peut avoir différentes configurations:

- 1) Linéaire;
- 2) Linéaire avec rehausse latérale ;
- 3) Linéaire avec rehausse angulaire ;
- 4) Linéaire avec double rehausse angulaire;
- 5) Composition angulaire

Materiali

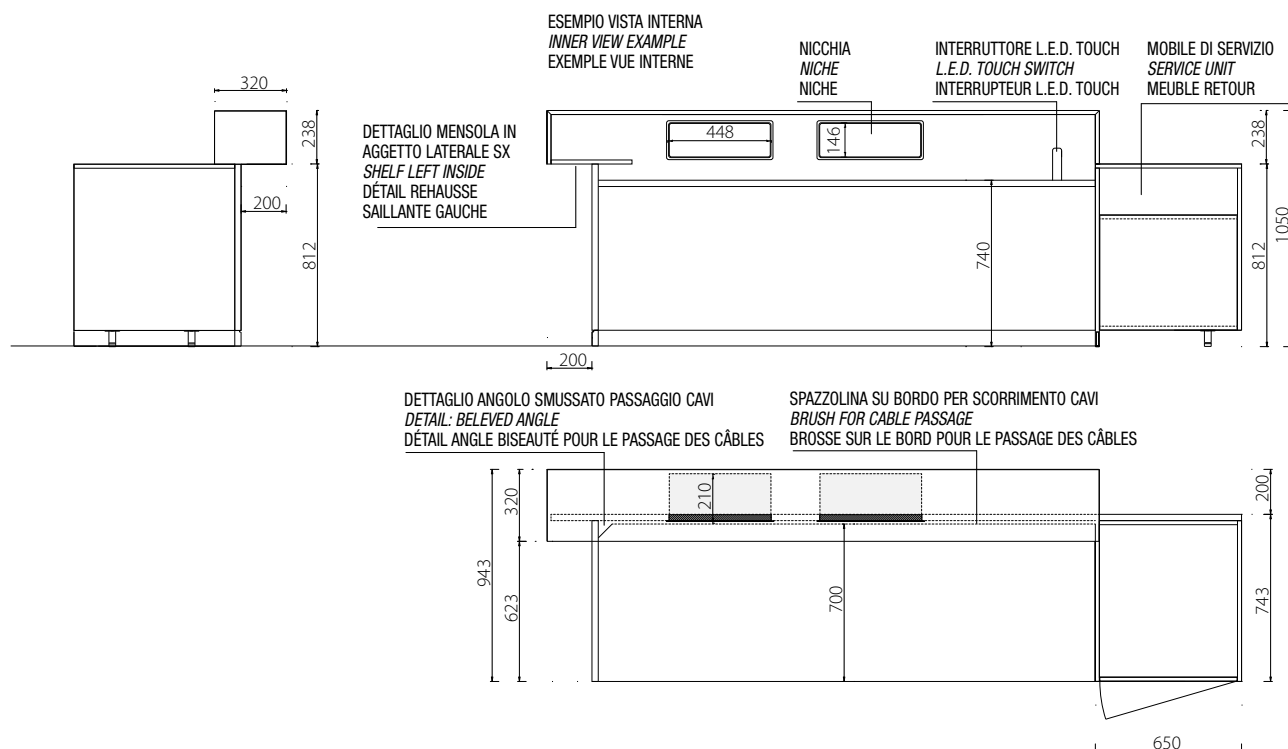

I pannelli frontali, i fianchi sono disponibili in spessore 28 mm.
I piani di lavoro interni e le alzate sono realizzati in spessore 18 mm.

Matériaux

Les panneaux avant, les panneaux latéraux et les dossierers sont disponibles en 28 mm d'épaisseur.
Les plans de travail intérieurs et les crédences sont disponibles en 18 mm d'épaisseur.

Materials

Front panels, side panels and splashbacks are available in 28 mm thickness.
Internal worktops and risers will be available in 18 mm thickness.

In fase d'ordine specificare sempre:

- quantità nicchie e posizione come da schemi
- inserimento L.E.D. con cablaggio predisposto a dx o sx

Always specify on the order :

- niche quantity and position as per drawings below
- L.E.D. insertion with wiring to the right or to the left

Lors de la commande à précisez toujours:

- Numéro de niches et positions selon schémas
- Insertion L.E.D. avec câblage à droite ou à gauche .

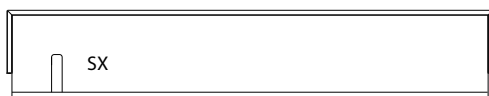

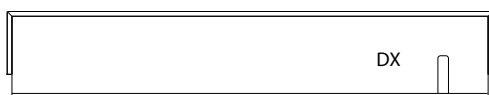

Comprende lavorazione sui pannelli e premontaggio di tutto il materiale.

Sarà sufficiente collegare l'alimentatore alla linea elettrica Just plug the power supply into the power line

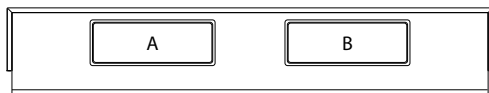

The L.E.D. kit includes the machining of the panels and pre-assembly of all materials.

Le Kit L.E.D. comprend l'usinage des panneaux et le pré-assemblage de tout le matériel. Branchez simplement le bloc d'alimentation à la ligne électrique

Descrizioni tecniche

I contenitori hanno le scocche realizzate in melaminico finitura grigio alluminio o bianco con sp.18 mm per i fianchi e 10 mm per le schiene; è prevista una doppia foratura a passo 32 mm per l'inserimento di attrezzature interne.

Le schiene inserite in luce a filo dei fianchi permettono l'utilizzo dei contenitori anche in ambientazioni a centro stanza.

I mobili h. 836 vengono forniti montati, nelle altezze 1636 e 1988 mm vengono forniti smontati ad esclusione di quelli con classificatori estraibili.

Grazie alla ferramenta impiegata il montaggio risulta semplice e rapido.

Tutti i bordi di tops, fondi, ante e cassettoni sono ad alto spessore con raggio 2 mm rispondenti, quindi, alle norme UNI per l'antinfurtivistica.

RIPIANI

Sono realizzati in metallo verniciato a polveri epossidiche con profilo sagomato, predisposti per l'aggancio di cartelle da 33 cm a lettura frontale.

TOPS e FONDI

Sono di spessore 18 mm in vero legno in abbinamento.

Nei fondi sono in dotazione piedini di appoggio livellatori regolabili dall'interno.

Opzionale è l'impiego dello zoccolo che viene consigliato, per una maggior sicurezza, nelle librerie con classificatori.

ANTE

Sono in vero legno.

Montano cerniere con apertura 105°. Le maniglie sono in materiale plastico nel colore grigio alluminio, lucido o bianco.

Sulle coppie di ante è applicata una battuta di chiusura parapolvere.

ANTE VETRO

Realizzate in vetro temperato sp. 4 mm con telaio alluminio verniciato a polveri epossidiche o cromatizzato.

CASSETTONI

Dotati di telaio estraibile con guide in metallo a riciclo di sfere montate nella foratura a passo 32 mm dei fianchi. Permettono l'utilizzo di cartelle a lettura superiore da 33, 38 e 39 cm per le larghezze da cm 100.

SERRATURE

Sulle ante in legno dei mobili sono applicate serrature con chiusura sul top per le h. 836 mm, ad asta rotante per le h. 1636 e 1988 mm con chiusura su top e fondo.

Sui cassettoni la serratura è posizionata sul primo cassetto e la chiusura è multipla.

Le chiavi in dotazione sono piegabili.

Technical descriptions

The containers have melamine aluminium grey or white finish body 18 mm for the sides and 10 mm for the backs. A 32 mm step double perforation is previewed for the insertion of inside equipments.

The backs inserted in open cabinet allow the use of the containers even in the centre of the room.

The elements 836 mm high are delivered already assembled. In 1636 and 1988 mm heights these are delivered disassembled with the exception of the filing unit. Thanks to the fittings used the assembly results simple and rapid.

All the edges of tops, bottoms, doors and frontals are high thickness in conformity with 2 mm radius and, therefore, in accordance with the UNI safety norm.

SHELVES

They are made in metal painted with epoxy powder with shaped profile, predisposed to hold 33 cm files.

TOP and BOTTOMS

They are of thickness 18 mm, in wood veneer.

In the bottoms are levelling feet adjustable from the inside.

Optional it is the employment of the plinth which is also recommended, for a great safety, in the bookstores with filing unit.

DOORS

These are in veneer.

They have 105° opening hinges. The handles are in plastic material in aluminium grey, shiny or white.

On the double doors a dust stopper is applied.

Librerie Space direzionali

GLASS DOORS

They are made in 4 mm thick tempered frosted glass with aluminium frame painted in epoxy powder or chromed.

FILING UNITS

Equipped pull-out frame with metal guides with ball bearings fixed in the 32 mm step holes. They allow the use 33, 38 and 39 cm for the 100 cm width.

LOCKS

On the bookcases doors of 836 mm high the lock is blocks on the top.

Whereas is of rotating action bar for the 1636 and 1988 mm high closing on top and bottom.

On the filing unit the lock is positioned on the first drawer and the closing is multiple.

The keys are folding.

Descriptions techniques

Les rangements ont le corps mélaminé de couleur gris aluminium ou blanc avec épaisseur de 18 mm pour les côtes latéraux et 10 mm pour la partie arrière; deux perforations au pas de 32 mm sont prévues pour l'accrochage d'accessoires internes. Grâce aux panneaux arrière appliqués exactement sur l'ouverture et au fil des côtes latéraux, il est possible d'utiliser ces armoires au milieu de la pièce.

Les meubles hauteurs 836 mm sont fournis pré-assemblés, alors que les meubles hauteurs 1636 et 1988 mm sont fournis démontés, à l'exception de ceux avec classeurs extractibles. Grâce au type de la quincaillerie d'assemblage employée, le montage est simple et rapide.

Tous les bords des tops, des bases, des portes et des façades des tiroirs sont d'une forte épaisseur avec rayon de 2 mm, conformément aux normes UNI de préventions des accidents.

TABLETTES

Réalisées en métal verni à des poussières époxydes avec un profil adéquatement façonné, elles sont prédisposées pour l'accrochement de dossiers de 33 cm à lecture frontale.

DESSUS ET BASES

D'une épaisseur de 18 mm, ils sont en bois.

Les bases sont équipés avec de verins d'appui et de mise à niveau, réglables de l'intérieur.

Le montage du socle, qui est en option, est conseillé pour une plus grande sécurité dans les bahuts classeurs.

PORTES

Elle sont en bois.

Elles sont dotées de charnières permettant une ouverture à 105°. Les poignées sont réalisées en matière plastique en gris aluminium, poli ou blanc. Sur les jeux de portes, il est appliqué un élément de frappe anti-poussière.

PORTES VITREES

Elles sont en verre trempé acidifié d'épaisseur 4 mm avec cadre en aluminium verni à des poussières époxydes ou chromé.

TIROIRS D.S.

Ils sont doués d'une structure extractible avec glissières métalliques à billes montées au pas de 32 mm à travers les perforations des joues latérales. Les tiroirs d'une largeur de 100 cm acceptent également les dossiers de 33, 38 et 39 cm.

SERRURES

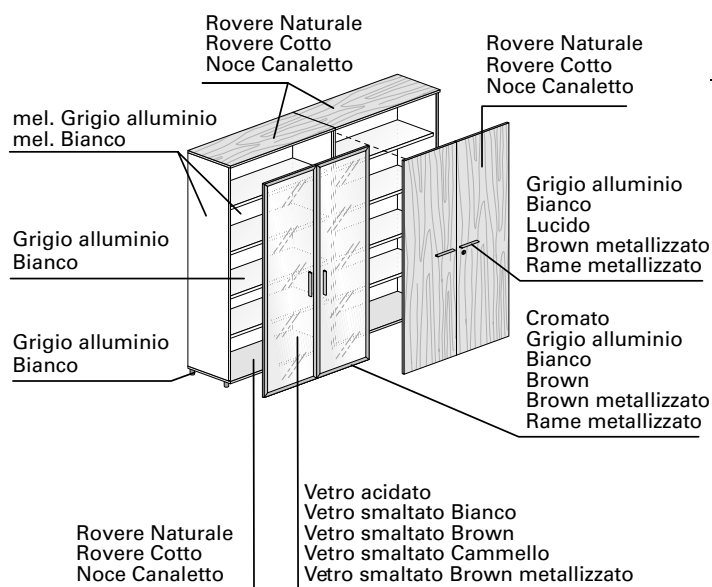

Sur les portes en bois des meubles sont montées des serrures avec fermeture sur le dessus pour les hauteurs de 836 mm, et à tige pivotante pour les hauteurs de 1636 et 1988 mm avec fermeture sur le dessus et le fond.

La serrure, appliquée sur le premier des tiroirs, verrouille l'ensemble.

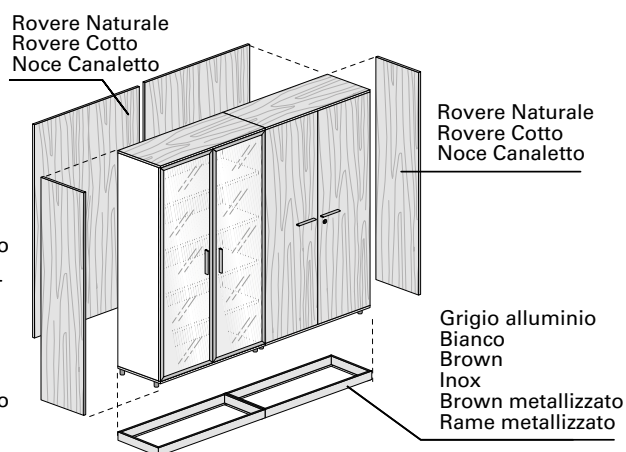

Les clés, fournies en dotation, sont repliables.

Lay

Sistema composto da scrivanie, contenitori aggregabili modulari a diverse altezze e finiture, scrivanie direzionali con contenitore portante, madia, librerie direzionali dedicate e tavoli da riunione.

Strutture

Le strutture sono caratterizzate da uno snodo in fusione di alluminio verniciato a polveri epossidiche colore Rosso, Blu, Antracite, Verde Oliva e Bianco.

La struttura comprende una canalina in lamiera di acciaio verniciata a polveri epossidiche per il cablaggio. Tappi in ABS a chiusura canalina in tinta. La vaschetta raccoglie i cavi sottopiano in acciaio verniciato a polveri epossidiche nelle stesse finiture della struttura e riposizionabile.

La struttura è predisposta per il kit di scorrimento piani, che rende possibile l'ispezione della vaschetta passacavi. Il blocco/sblocco degli stessi è azionabile tramite un pistoncino di posizionamento a molla in cinque posizioni. Le gambe sono in tubolare d'acciaio con sezione ovale 50x25 mm e verniciate a polveri epossidiche nelle stesse finiture dello snodo. Alla base un piedino in ABS con un'escursione di 5 mm per la regolazione a pavimento. Disponibile anche con regolazione in altezza a passo 20 mm.

Piani

I piani sono proposti in melaminico decoro legno e tinta unita spessore 18 mm, in CDF spessore 12 mm (Compact Density Fibreboard) e nella versione direzionale in essenza di legno spessore 18 mm.

Contenitori

I contenitori sono realizzati in melaminico spessore 18 mm con top finitura in laccato spessore 12 mm, CDF spessore 12 mm o melaminico sp. 18 mm. Sono moduli di altezza 400 mm, profondità 400 mm e di larghezza da 400/600/800/1600 mm sia a giorno che con anta (con serratura a richiesta) aggregabili in altezza e reversibili. Possono essere completati da nicchie prof. 200/400 mm e larghezza 400/600/800 mm. I moduli sono sempre in una unica finitura, mentre le maniglie sono in ABS in tinta con il modulo richiesto se è tinta unita, mentre se il modulo è in decoro seguono la struttura metallica.

Lay

System composed of desks, modular storage units with different heights and finishes, executive desks with supporting storage unit, low credenza, executive cupboard and meeting tables.

Structures

The structures are characterized by a joint in die cast aluminium painted with epoxy powders in Red, Blue, Anthracite, Olive Green and White.

The structure includes an epoxy powder coated steel sheet duct for wiring. Channel-closing ABS caps with matching colour. The under-top cable tray is made of epoxy powder coated steel in the same finishes as the structure and can be repositioned.

The structure is predisposed for the sliding top kit, which makes possible the inspection of the cable tray.

The lock/unlock system is made by a spring actuated pin with five positions.

The legs are in tubular steel profile with an oval section of 50x25 mm and epoxy powder coated in the same finishes as the joint.

At the base, an ABS foot with a 5 mm travel for floor adjustment. Also available with height adjustment in pitch 20 mm.

Tops

The tops are available in 18 mm thick melamine wood and solid color decoration, 12 mm thick CDF (Compact Density Fibreboard) and in the executive version in 18 mm thick wood essence.

Containers

The containers are made of 18 mm thick melamine with 12 mm thick lacquered or CDF top, alternately 18 mm thick melamine top. They are modules with a height of 400 mm, a depth of 400 mm and a width of 400/600/800/1600 mm, both open and with doors (with lock on request) that can be combined in height and reversible. They can be completed by niches in depth of 200/400 mm and width 400/600/800 mm.

Lay

Système composé de bureaux, d'armoires modulaires de différentes hauteurs et finitions, de bureaux de direction avec armoires de direction dédiées et armoires porteuses, de tables de réunion.

Structures

Les structures sont caractérisées par un joint en fonte d'aluminium peint avec des poudres époxy en Bleu, Olive Vert, Blanc, Anthracite et Rouge. La structure comprend une poutre en tôle d'acier revêtue de poudre époxy pour le câblage. Capuchons en ABS pour fermeture de la poutre (revêtement époxy sur demande). La goulotte pour les câbles est réalisée en acier revêtu de poudre époxydique dans les mêmes finitions que la structure et peut être repositionné. La structure est préparée pour le kit de coulissement des plateaux, ce qui permet l'accès à la goulotte. Leur verrouillage/déverrouillage peut être actionné par un système de ressort à cinq positions. Les pieds sont un profil d'acier tubulaire en section ovale et revêtus d'une poudre époxy de la même finition que le joint. A la base un vérin en ABS avec un jeu de 5 mm pour ajustement au sol. Aussi disponible avec une hauteur d'ajustement au pas 20 mm.

Plateaux

Les plateaux sont disponibles en mélaminé d'épaisseur 18 mm, en CDF (Compact Density Fibreboard) de 12 mm d'épaisseur et dans la version direction en essence de bois de 18 mm d'épaisseur.

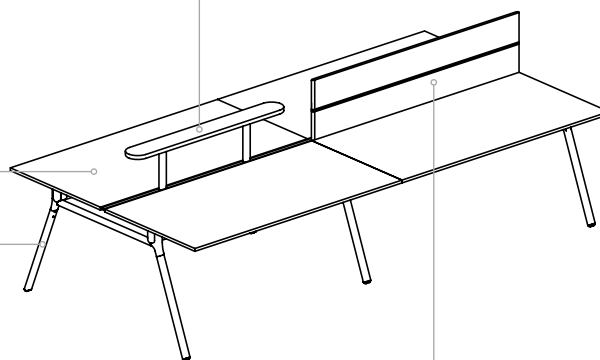

Armoires

Les armoires sont réalisés en mélamine d'épaisseur 18 mm avec un top laqué/cdf de 12 mm d'épaisseur ou mélaminé de 18 mm d'épaisseur. Il s'agit de modules d'une hauteur de 400 mm, d'une profondeur de 400 mm et d'une largeur de 400/600/800/1600 mm, ouverts ou avec des portes (avec serrure sur demande) qui peuvent être combinés en hauteur et inversés. Ils peuvent être complétés par des niches de profondeur 200/400 mm et largeur 400/600/800 mm.

Lay dispone di un sistema di moduli per comporre armadiature, spine e mobili di servizio adatti ad ogni progetto. Le basi disponibili sono tre: panca operativa, panca per scrivania in appoggio e libreria su piedini. La panca operativa e la libreria su piedini servono a comporre spine, la panca bassa si usa nei mobili di servizio. I moduli possono essere girati e ribaltati di 180 gradi. Senza fissaggio a muro si possono sovrapporre fino a tre moduli alti 400 mm o un modulo da 400 mm e uno da 800 mm, ma non è possibile sovrapporre due nicchie. Alle composizioni è possibile abbinare scrivanie e bench, aggregandoli sia all'interno di specifiche nicchie che sulle schiene di determinati moduli (pg. 8/9).

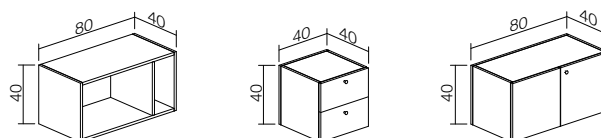

Lay disposes of a system of modules to compose cabinets, spines and service units suitable for any project. There are three supports available: an operative bench, a desk supporting bench and a bookcase on feet. The operative bench and the bookcase on feet are used to compose spines, the low bench is used in the service unit. The modules can be turned and flipped by 180°. Without wall fixing you can overlap up to three modules 400 mm high or a module of 400 mm and one of 800 mm, but you cannot overlap two niches. To the composition it is possible to combine desks and bench, aggregating them both within specific niches and on the backs of specific modules (pages 8/9).

La gamme LAY dispose d'un système de modules pour composer des armoires, spines et des meubles de service adaptés à chaque projet. Trois bases sont disponibles : une banquette opérative, une banquette pour bureau en appui et un armoire sur vérins. La banquette opérative et l'armoire sur vérins sont utilisés pour composer les spines, la banquette basse est utilisée pour les meubles de service. Les modules armoire peuvent être tournés et renversés de 180 degrés. Sans fixation au mur, il est possible de superposer jusqu'à trois modules de 400 mm de hauteur ou un module de 400 mm et un module de 800 mm de hauteur, mais il n'est pas possible superposer deux niches. Les compositions peuvent être combinées avec des bureaux et des bench, en les agrégeant à superposer l'intérieur de niches spécifiques ou au dos de modules spécifiques (pages 8/9).

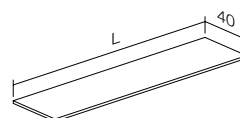

1 Scegliere il tipo di supporto. Choose the kind of support. Choisir le support.

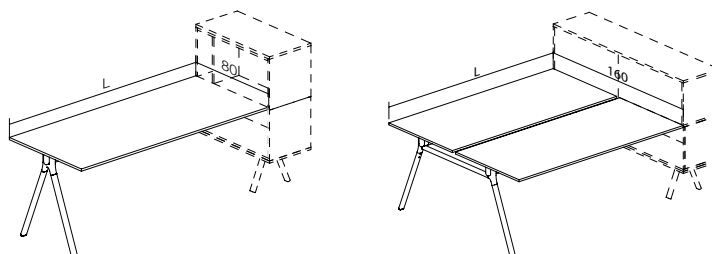

2 Scegliere i moduli, partendo dal basso. Choose the modules, starting from below. Choisir les modules en démarrant par- tant du bas.

3 Scegliere il top di finitura. Choose the finishing top. Choisir le top de finition.

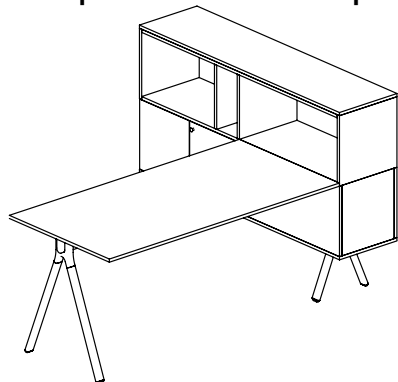

4 Scegliere la scrivania (opzionale). Choose the desk (optional). Choisir le bureau (optionell).

Il nuovo scaffale Lay è composto da una struttura modulare ed autoportante. Può essere utilizzato a centro stanza fino all'altezza 145 e si possono integrare scrivanie e bench alla struttura. Lo scaffale è realizzato interamente in metallo, eccetto i piedini in abs regolabili in altezza. I ripiani sono ad altezza fissa e quindi non regolabili in quanto portanti. I ripiani sono disponibili in lunghezza 40, 80 e 120, con altezza 20 mm. I ripiani più in alto hanno un carter per mascherare la struttura portante.

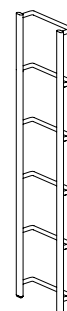

The new Lay shelf is composed of a modular and self-supporting structure. It can be used in the middle of the room up to a height of 145 and desks and benches can be integrated into the structure. The shelf is made entirely of metal, except for the height-adjustable abs feet. The shelves are fixed height and therefore not adjustable as they are load-bearing. Shelves are available in length 40, 80 and 120, with height 20 mm. The top shelves have a casing to hide the supporting structure from view.

La nouvelle étagère Lay est composée d'une structure modulaire et autoportante. Il peut être utilisé au centre de la pièce jusqu'à une hauteur de 145 et des bureaux et des bancs peuvent être intégrés à la structure. L'étagère est entièrement en métal, à l'exception des pieds en abs réglables en hauteur. Les étagères sont à hauteur fixe et ne sont donc pas réglables car elles sont porteuses. Les étagères sont disponibles dans les longueurs 40, 80 et 120, avec une hauteur de 20 mm. Les étagères du haut sont dotées d'un carter qui permet de cacher la structure porteuse à la vue.

ELLAN

Ellan è una collezione di tavoli, librerie e contenitori di servizio.

Un profilo metallico al L caratterizza la linea, creando un gioco di alternanze e realizzando una linea formale ed elegante. Il prodotto è realizzato con metodi artigianali e piccole imperfezioni ed irregolarità non sono da attribuirsi ad un difetto di fabbricazione bensì alla particolarità del materiale e delle lavorazioni e sono invece da considerare come elementi caratterizzanti l'unicità del singolo pezzo prodotto.

STRUTTURA:

E' in profilato di ferro con sezione 50x50 mm, con verniciatura protettiva o verniciato a polveri epossidiche. La struttura è sprovvista di piedini regolabili.

PIANI:

I piani sono realizzati in agglomerato ligneo e hanno spessore di mm 18. Tutti i piani sono bordati perimetralmente con abs e hanno spigoli arrotondati mm 2.

CONTENITORI:

Tutti gli elementi dei contenitori sono realizzati in melaminico da 18mm, mentre le schiene delle librerie sono in melaminico spessore 10 mm bianco o antracite.

Le schiene di finitura possono essere scelte in una finitura melaminica a piacimento.

La chiusura delle ante è con meccanismo premi-apri.

I contenitori possono avere la base in ferro coordinata alle scrivanie oppure essere sospesi e fissati a muro.

La collezione è completata da un pensile metallico.

ELLAN

Ellan is a collection of tables, bookcases and service containers.

An L-shaped metal profile characterises the line, creating a game of alternations and creating a formal and elegant line. The product is made using artisanal methods. Small imperfections and irregularities are not to be attributed to a manufacturing defect but rather to the particularity of the material and workmanship and are instead to be considered as elements characterising the uniqueness of the individual piece produced.

STRUCTURE:

It is made of iron section bars with a 50x50 mm cross-section, with protective paint or epoxy powder coated. The structure does not have adjustable feet.

TABLES:

The tops are made of agglomerated wood and are 18 mm thick. All tops are edged with ABS and have 2 mm rounded edges.

CONTAINERS:

All elements of the storage units are made of 18 mm melamine, while the backs of the bookcases are made of 10 mm thick white or anthracite melamine.

The backs can be chosen in any melamine finish.

The doors are closed with a push-to-open mechanism.

The storage units can have an iron base to match the desks or be suspended and fixed to the wall.

The collection is completed by a metal wall unit.

ELLAN

Ellan est une collection de tables, de bibliothèques et de conteneurs de service.

Un profil métallique en forme de L caractérise la ligne, créant un jeu d'alternances et une ligne formelle et élégante. Le produit est fabriqué selon des méthodes artisanales, et les petites imperfections et irrégularités ne doivent pas être attribuées à un défaut de fabrication, mais plutôt à la particularité du matériau et de l'exécution, et doivent plutôt être considérées comme des éléments caractérisant l'unicité de la pièce individuelle produite.

STRUCTURE :

Elle est constituée de barres de fer de 50x50 mm de section, recouvertes d'une peinture de protection ou d'un revêtement époxy. La structure n'a pas de pieds réglables.

TABLES :

Les plateaux sont en bois aggloméré et ont une épaisseur de 18 mm. Tous les plateaux sont bordés d'ABS et ont des bords arrondis de 2 mm.

CONTENEURS :

Tous les éléments des meubles de rangement sont en mélaminé de 18 mm, tandis que les dos des bibliothèques sont en mélaminé blanc ou anthracite de 10 mm d'épaisseur.

Les dos de finition peuvent être choisis dans n'importe quelle finition de mélamine.

Les portes se ferment à l'aide d'un mécanisme push-to-open.

Les meubles de rangement peuvent avoir une base en fer assortie aux bureaux ou être suspendus et fixés au mur.

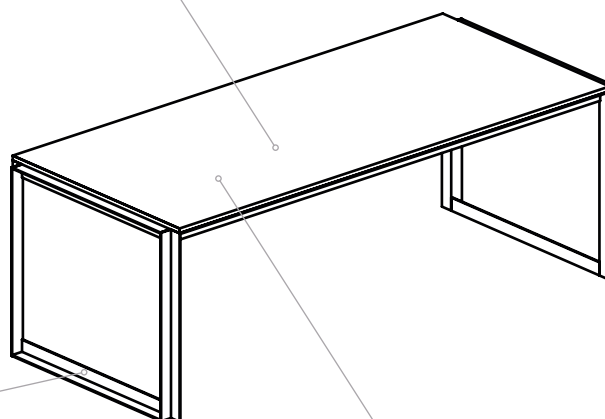

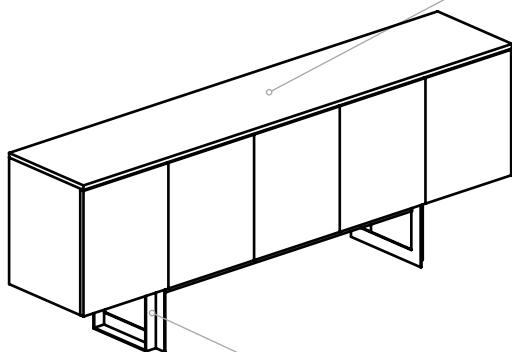

La collection est complétée par un meuble mural en métal.

Mod Line

È una collezione di tavoli con struttura in tubolare a sezione quadrata dalla linea minimale e rigorosa.

La collezione comprende scrivanie, bench, tavoli riunione e tavoli alti. Ad integrazione del sistema concorrono le librerie e le cassettiere su ruote presenti nella collezione Space, Unit, Multilinea e JMBridge

STRUTTURA:

E' in tubolare di acciaio a sezione quadrata con lato 40 mm, verniciato a polveri epossidiche.

La trave centrale dispone di fori per il passaggio dei cavi ed è canalizzabile; per l'alloggiamento delle multiprese è necessario aggiungere le vasche portacavi.

PIANI:

I piani in melaminico hanno lo spessore di mm 18. Tutti i piani sono bordati perimetralmente con abs e hanno spigoli arrotondati mm 2.

Mod Line

It is a collection of tables with a square-section tubular frame with a minimal and rigorous design.

The collection includes desks, benches, meeting tables and high tables and the system is complementary to our bookcases and pedestals collections Space, Unit, Multilinea and JMBridge.

FRAME:

40x40 mm squared section tubular steel, powder coated and fitted with adjustable feet at the base with a height above floor level of 73 cm. The central beam has holes for cables routing and can be used for cable management; cable trays must be added to accommodate sockets.

TOPS:

The melamine tops are 18 mm thick with ABS edging with 2 mm rounded corners.

Mod Line

Il s'agit d'une collection de tables avec un piètement tubulaire à section carrée au design minimal et rigoureux.

La collection comprend des bureaux, des bench, des tables de réunion et des tables hautes. Le système est complémentaire de nos collections de bibliothèques et de caissons Space, Unit, Multilinea et JMBridge.

PIETEMENT :

Tubulaire d'acier à section carrée 40x40 mm, peint époxy et équipé de pieds réglables à la base, avec une hauteur au-dessus du sol de 73 cm. La poutre centrale est percée pour le passage des câbles et peut être utilisée pour la gestion des câbles ; des goulottes doivent être ajoutées pour accueillir les prises.

PLATEAUX :

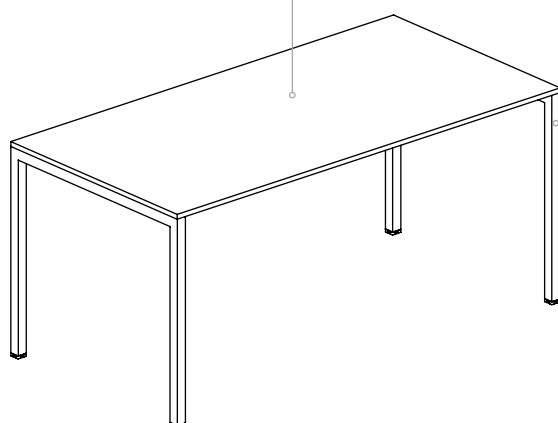

Les plateaux en mélamine ont une épaisseur de 18 mm et sont dotés d'un chant en ABS avec des coins arrondis de 2 mm.

Mod Round

È una collezione di tavoli con struttura in tubolare curvato dalla linea minimale e sottile.

La collezione comprende scrivanie, bench, tavoli riunione e tavoli alti e ad integrazione del sistema concorrono le librerie e le cassettiere su ruote presenti nella collezione Space, Unit, Multilinea e JMBridge.

STRUTTURA:

E' in tubolare di acciaio a sezione rotonda con diametro 35 mm, verniciato a polveri epossidiche. Monta piedini registrabili alla base con un'altezza soprapiano di cm 73. La trave centrale dispone di fori per il passaggio dei cavi ed è canalizzabile; per l'alloggiamento delle multiprese è necessario aggiungere le vasche portacavi.

PIANI:

I piani in melaminico hanno lo spessore di mm 18. Tutti i piani sono bordati perimetralmente con abs e hanno spigoli arrotondati mm 2.

Mod Round

It is a collection of tables with curved tubular frame with a minimal and slim design.

The collection includes desks, benches, meeting tables and high tables and the system is complementary to our bookcases and pedestals collections Space, Unit, Multilinea and JMBridge.

FRAME:

35 mm diameter round section tubular steel, powder coated and fitted with adjustable feet at the base with a height above floor level of 73 cm. The central beam has holes for cables routing and can be used for cable management; cable trays must be added to accommodate sockets.

Tops:

The melamine tops are 18 mm thick with ABS edging with 2 mm rounded corners.

Mod Round

Il s'agit d'une collection de tables à structure tubulaire incurvée au design minimal et élancé.

La collection comprend des bureaux, des bench, des tables de réunion et des tables hautes. Le système est complémentaire de nos collections de bibliothèques et de caissons Space, Unit, Multilinea et JMBridge.

PIETEMENT :

Tubulaire d'acier à section ronde diam. 35 mm, peint époxy et équipé de pieds réglables à la base, avec une hauteur au-dessus du sol de 73 cm. La poutre centrale est percée pour le passage des câbles et peut être utilisée pour la gestion des câbles ; des goulottes doivent être ajoutées pour accueillir les prises.

PLATEAUX :

Les plateaux en mélamine ont une épaisseur de 18 mm et sont dotés d'un chant en ABS avec des coins arrondis de 2 mm.

Mod Plan

Quarel è una linea di scrivanie pannellate. La collezione è caratterizzata dalle testa delle viti brunate che sporgono sui fianchi, creando un segno identificativo che si sussegue in tutta la collezione.

Le scrivanie sono realizzate con pannelli di spessore 28 mm bordati in abs con raggio 2 mm e sono dotate di piedini regolabili in ABS.

I bench hanno un vano per il contenimento cavi integrato e non necessitano di vasche passacavi.

Mod Plan

Mod Plan is an operative line of panelled desks. The collection is characterised by the burnished screw heads that protrude from the sides, creating an identifying signature that continues throughout the collection. The desks are made of 28 mm thick panels edged in ABS with a 2 mm radius and are equipped with adjustable ABS feet.

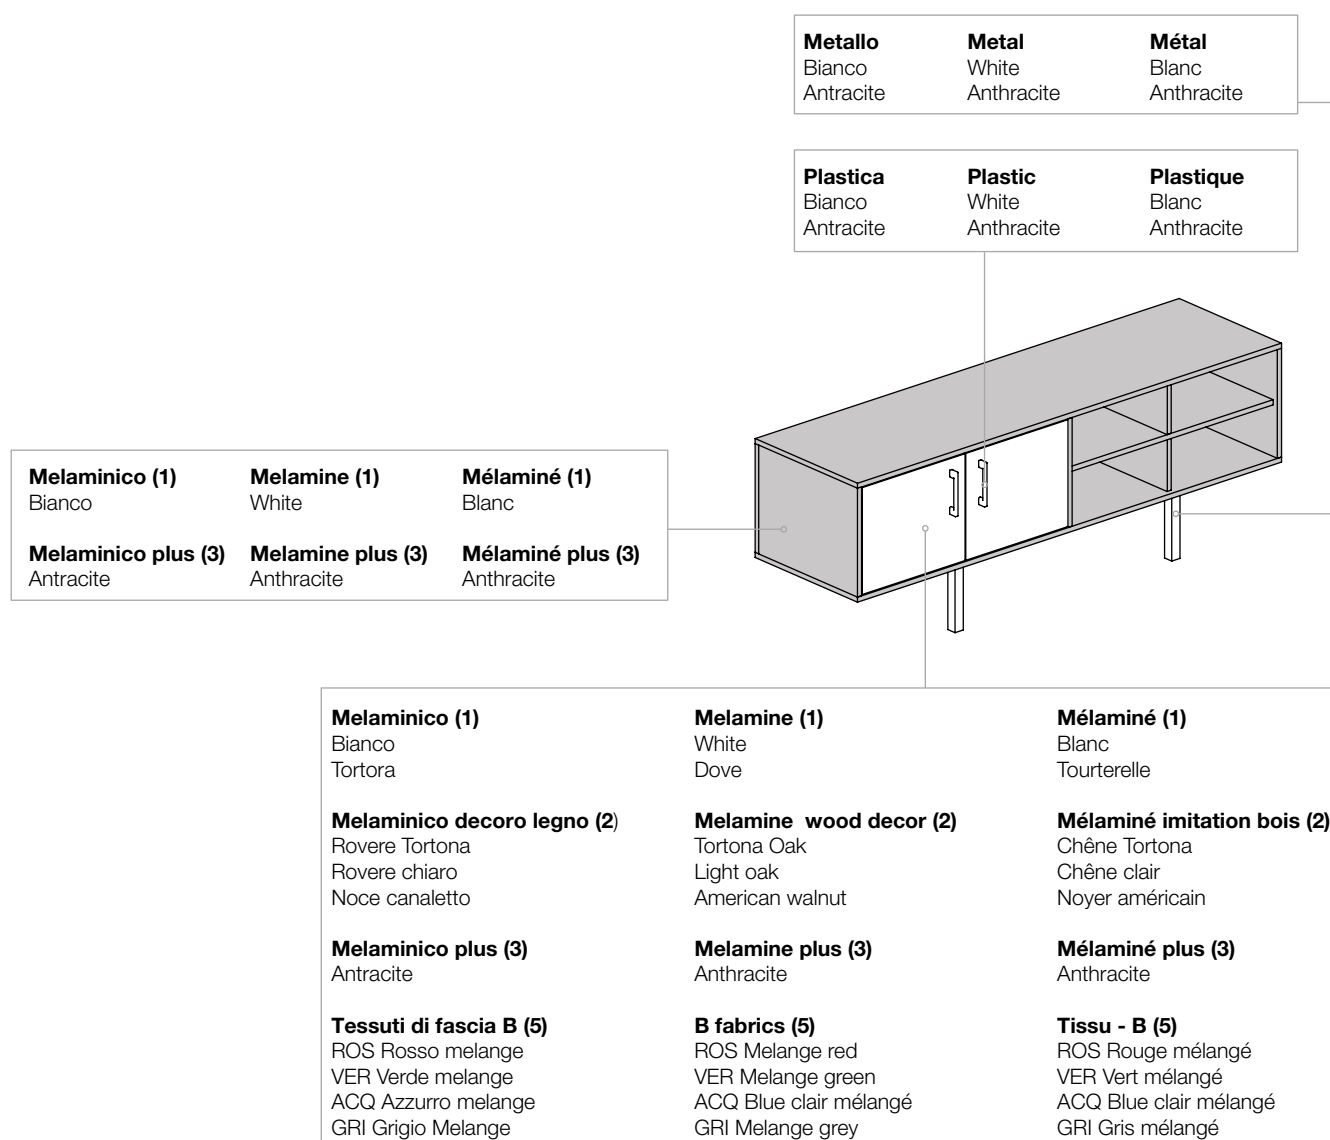

The benches have an integral cable storage compartment and do not require any cable trays.

Mod Plan

Mod Plan est une ligne de bureaux opérationnels à pied panneau. La collection se caractérise par les têtes de vis brunies qui dépassent sur les côtés, créant ainsi une marque d'identification qui se poursuit dans toute la collection.

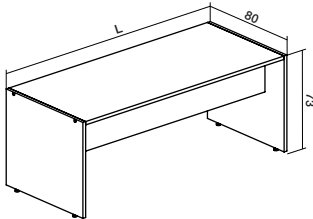

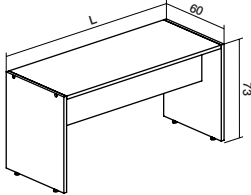

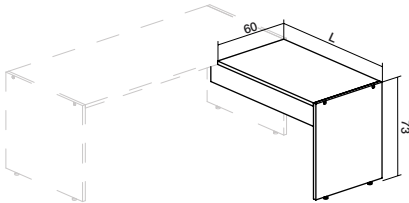

Les bureaux sont constitués de panneaux de 28 mm d'épaisseur bordés en ABS avec un rayon de 2 mm et sont équipés de pieds réglables en ABS.

Les bench sont dotés d'un compartiment intégré pour le rangement des câbles et ne nécessitent pas de goulottes.

Arch.E

Arch.E è una linea di scrivanie ergonomiche dotate di un meccanismo elettrico per la regolazione in altezza.

I piani delle scrivanie sono realizzate con pannelli di spessore 28 mm bordati in abs con raggio 2 mm e sono dotate di piedini regolabili in ABS.

Le strutture sono realizzate in metallo verniciato a polveri epossidiche.

La gamba ha tre stadi di elevazione ed è a sezione quadrata 70 mm x 70 mm.

La collezione è compatibile con le vaschette portacavi e con i top access e passacavi delle altre collezioni Archiutti.

Arch.E

Arch.E is a line of ergonomic desks equipped with an electric mechanism for height adjustment.

The desk tops are made of 28 mm thick panels edged in ABS with a 2 mm radius and are equipped with adjustable ABS feet.

The structures are made of epoxy powder-coated metal.

The leg has three stages of elevation and a 70mm x 70mm square section

The collection is compatible with the cable trays and access tops of the other Archiutti collections.

Arch.E

Arch.E est une gamme de bureaux ergonomiques équipés d'un mécanisme électrique de réglage en hauteur.

Les plateaux sont constitués de panneaux de 28 mm d'épaisseur bordés en ABS avec un radius de 2 mm et sont équipés de pieds réglables en ABS.

Les structures sont en métal peint époxy. La jambe a trois niveaux d'élévation et est de forme carrée de 70 mm x 70 mm.

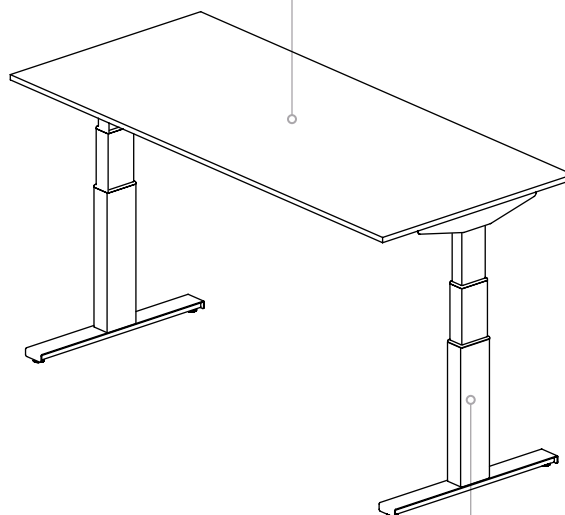

La collection est compatible avec les goulottes, les top access et les obtourateurs des autres collections Archiutti.

F.loat O.ffice

È un sistema di tavoli e contenitori di servizio.

Consente di personalizzare la funzionalità del proprio tavolo attraverso una molteplicità di aggregazioni con una diversità di materiali di finitura dei piani e l'accessoriabilità delle strutture.

F.loat O.ffice recupera un legame indissolubile tra piano e struttura sottopiano in metallo verniciato: tale caratteristica limita il numero di composizioni, ma risulta economicamente molto più vantaggiosa.

AD INTEGRAZIONE DEL SISTEMA CONCORRONO LE LIBRERIE E LE CASSETTIERE SU RUOTE PRESENTI NELLA COLLEZIONE SPACE, UNIT, MULTILINEA E JMBRIDGE

STRUTTURA:

E' in tubolare di acciaio con sezione 60x30 mm, verniciato a polveri epossidiche. Monta piedini regolabili alla base con un'altezza sopra-piano di cm 73.

PIANI:

I piani in agglomerato di legno hanno lo spessore di mm 18, sono fornibili in nobilitato. Tutti i piani sono bordati perimetralmente con abs e hanno spigoli arrotondati mm 2.

F.loat O.ffice

F.loat O.ffice is a table and container system, which allows to personalise the functionality of the table itself through a variety of combinations with an assortment of top finishes and the accessories that can be applied to the structure.

F.loat O.ffice recovers the bond between the top and the under structure in varnished metal: such characteristic limits the number of compositions, but it results in a much more economic range.

THE SYSTEM CAN BE INTEGRATED WITH THE BOOKCASES AND WHEELED DRAWER UNITS OF THE SPACE COLLECTION. UNIT, MULTILINEA AND JMBRIDGE

STRUCTURE:

It is made of tubular steel with a cross section 60x30 mm, epoxy powder coated. Equipped with adjustable feet and an overall top height of 73 cm.

TOPS:

The 18 mm thick particle board tops are available in melamine). All tops have an ABS edging with 2 mm rounded corners.

F.loat O.ffice

F.loat O.ffice est un système de tables et meubles de service.

Il permet de personnaliser les fonctions du poste de travail grâce à de nombreuses possibilités d'agrégation, avec des matériaux de finition différents pour les plans et l'accès-oirisation des structures.

F.loat O.ffice récupère un lien indissoluble entre plateau et structure sous-plateau en métal verni: telle caractéristique limite le numéro de compositions, mais économiquement résulte beaucoup plus avantageuse.

LE SYSTÈME EST COMPLÉTÉ PAR LES BIBLIOTHÈQUES ET LES CAISSONS SUR ROULETTES PRÉSENTS DANS LA COLLECTION SPACE. UNIT, MULTILINEA E TJMBRIDGE

STRUCTURE:

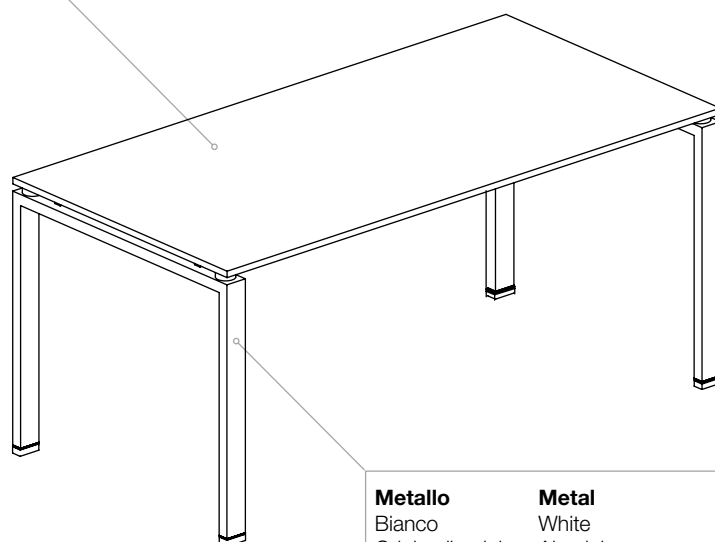

C'est un tubulaire en acier avec section 60x30 mm, verni époxy. Elle est équipée de vérins réglables à la base avec une hauteur de travail de 73 cm.

PLANS:

Les plans en aggloméré de bois ont une épaisseur de 18 mm, ils sont disponibles surfacés mélamines. Tous les plans sont munis sur tout le pourtour d'un chant en ABS avec arêtes arrondies 2 mm.

Su richiesta sono disponibili le serrature digitali - Digital locks available on request - Serrures électroniques disponibles sur demande

I locker sono dei contenitori funzionali agli spazi condivisi e alle zone di accesso degli uffici. Consentono di riporre gli oggetti personali di impiegati e visitatori in spazi sicuri. Sono disponibili con le classiche serrature con chiave o con serrature a combinazione meccaniche. Su richiesta sono disponibili le serrature digitali. Le strutture e i ripiani sono realizzate in melaminico bianco spessore 18 mm, mentre le ante sono disponibili in varie finiture, sempre in melaminico spessore 18 mm.

Lockers are used for shared spaces and office access areas. They allow for the personal belongings of employees and visitors to be stored in secure spaces. They are available with classic key locks or mechanical combination locks. Digital locks available on request. The structures and shelves are made of 18 mm thick white melamine, while the doors are available in various finishes, also in 18 mm thick melamine.

Les casiers sont des éléments destinés aux espaces communs et aux zones d'accès aux bureaux. Ils permettent de stocker les effets personnels des employés et des visiteurs dans des espaces sécurisés. Ils sont disponibles avec des serrures à clé classique ou à combinaison mécaniques. Serrures électroniques disponibles sur demande. Les structures et les étagères sont en mélamine blanche de 18 mm d'épaisseur, tandis que les portes sont disponibles en différentes finitions, également en mélamine de 18 mm d'épaisseur.

Il mobile contenitore JMBridge è un modello multilinea, utilizzabile sia su Lay che su Float office. Nella versione bifacciale ogni operatore dispone di un'anta con pomolo e serratura, un vano a profondità 40 cm e un mezzo vano a profondità 20 cm. Il vano dotato di anta serve per contenere gli effetti personali dell'operatore, ed è dotato di serratura.

ATTENZIONE ALLE MISURE DEL PIANO!

Il piano di lavoro risulta ridotto rispetto dalla misura totale del bench di 20 cm nel caso dei bench a 4 posti, e di 40 cm nel bench a 2 posti rispetto ad un bench senza JMBridge della stessa lunghezza.

The JMBridge storage unit is a multi-line model that can be used on both Lay and Float offices. In the double-sided version, each operator has a door with knob and lock, a compartment 40 cm deep and a half compartment 20 cm deep. The compartment with the door is used to store the operator's personal belongings and is equipped with a lock.

PAY ATTENTION TO THE DIMENSIONS OF THE WORKTOP!

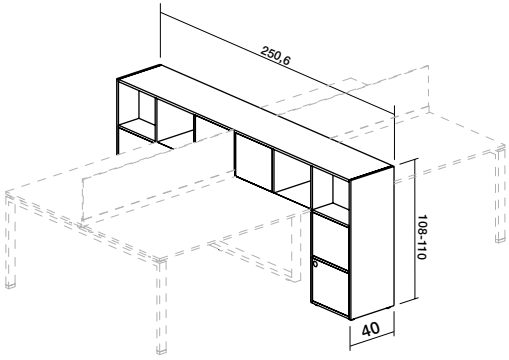

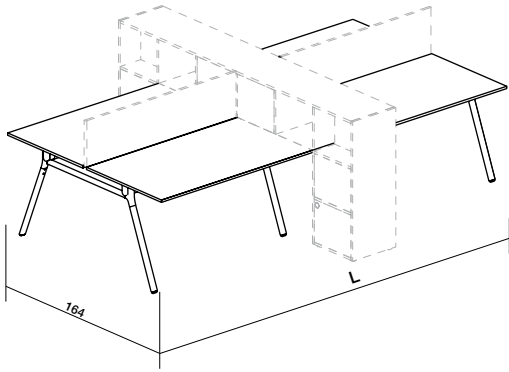

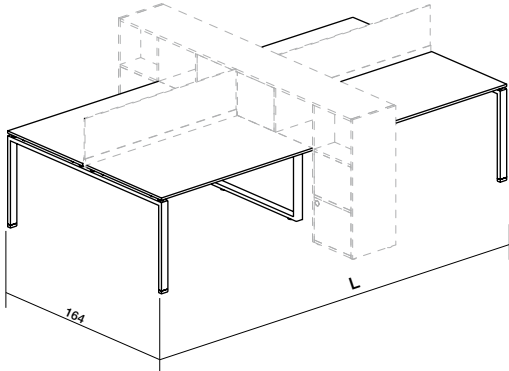

The work surface is 20 cm shorter than the total length of the bench in the case of a 4-person bench and 40 cm shorter than a bench without a JMBridge of the same length in the case of a 2-person bench.

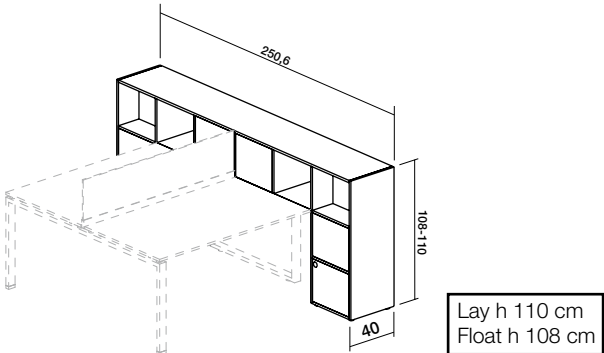

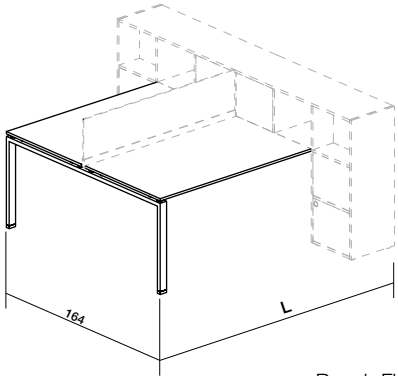

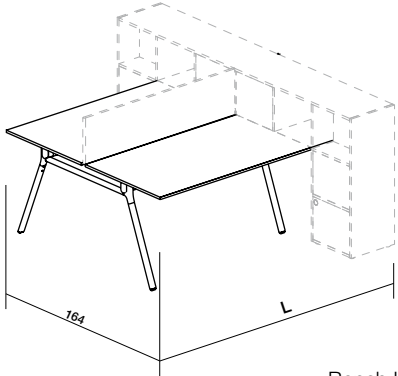

L'unité de stockage JMBridge est un modèle multi-lignes qui peut être utilisé sur les bureaux Lay et Float. Dans la version double face, chaque opérateur dispose d'une porte avec bouton et serrure, d'un compartiment de 40 cm de profondeur et d'un demi-compartiment de 20 cm de profondeur. Le compartiment avec porte est utilisé pour ranger les effets personnels de l'opérateur et est équipé d'une serrure.

ATTENTION AUX DIMENSIONS DU PLAN DE TRAVAIL !

Le plan de travail est 20 cm plus court que la longueur totale du banc dans le cas d'un banc pour 4 personnes et 40 cm plus court qu'un banc sans

JMBridge de même longueur dans le cas d'un banc pour 2 personnes.

La reception Hugo è un sistema modulare dalla linea sobria e minimale. I piani di lavoro sono di profondità 70 cm, realizzati in melaminico spessore 28 mm. I pannelli frontali sono realizzati in melaminico spessore 28 mm, con giunzioni a 45 gradi con i fianchi. Le alzate sono in melaminico spessore 18 mm con giunzioni a 45 gradi e retroilluminazione a led opzionale. Ogni composizione deve prevedere almeno un modulo di partenza e un modulo di chiusura, mentre quelli centrali e le alzate si possono aggiungere secondo progetto, eccetto le reception singole che sono già complete.

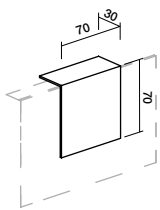

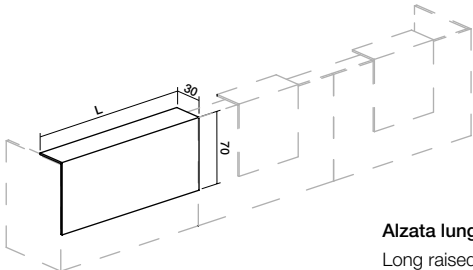

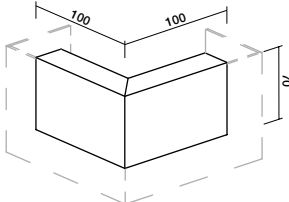

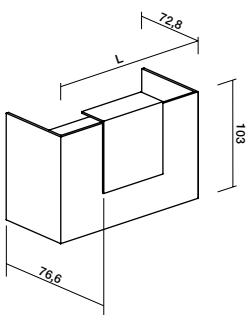

The Hugo reception is a modular system with a minimal and sober line. The frontal panels are made of 28 mm thick melamine, with 45 degree joint with the sides. The raised unit is made in 18 mm thick melamine, with optional led backlighting. Every composition must have at least an opening and a closing module, and as many central modules and raised units as needed. Meanwhile the single unit reception are a stand alone product, where the only possible options are the length and the optional led.

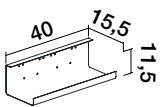

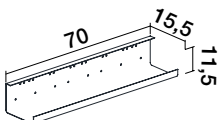

La réception Hugo est un système de réception modulaire au design sobre et minimaliste. Les plateaux de travail ont une profondeur de 70 cm et sont en mélamine de 28 mm d'épaisseur. Les panneaux frontaux sont en mélamine de 28 mm d'épaisseur, avec des coupes à 45 degrés dans les joints avec les côtés. Les rehausses sont en mélamine de 18 mm d'épaisseur avec des coupes à 45 degrés, avec un rétro-éclairage LED en option.

Chaque composition doit comprendre au moins un module de départ et un module de fermeture, tandis que les modules centraux et les rehausses peuvent être ajoutés en fonction du projet, à l'exception des réceptions indépendantes qui sont déjà complètes.

I contenitori hanno le scocche realizzate in melaminico con sp. 18 mm per i fianchi e 10 mm per le schiene; è prevista una doppia foratura a passo 32 mm per l'inserimento di attrezzature interne.

Le schiene inserite in luce a filo dei fianchi permettono l'utilizzo dei contenitori anche in ambientazioni a centro stanza.

I mobili h. 760, 836 e 1120 mm vengono forniti montati, nelle altezze: 1636 e 1988 mm vengono forniti smontati ad esclusione di quelli con classificatori estraibili. Grazie alla ferramenta impiegata il montaggio risulta semplice e rapido.

Tutti i bordi di tops, fondi, ante e cassettoni sono ad alto spessore con raggio 2 mm rispondenti, quindi, alle norme UNI per l'antifortunistica.

RIPIANI

Sono realizzati in metallo verniciato a polveri epossidiche con profilo sagomato, predisposti per l'aggancio di cartelle da 33 cm a lettura frontale.

TOPS e FONDI

Sono di spessore 18 mm, in melaminico.

Nei fondi sono in dotazione piedini di appoggio livellatori regolabili dall'interno.

Opzionale è l'impiego dello zoccolo che viene consigliato, per una maggior sicurezza, nelle librerie con anta a serrandina o con cassettoni ed è obbligatorio nelle librerie in sovrapposizione.

ANTE

Sono di spessore 18 mm, in melaminico.

Montano cerniere con apertura 105°. Le maniglie sono in materiale plastico.

Sulle coppie di ante è applicata una battuta di chiusura parapolvere.

Ante scorrevoli a serrandina costituite da elementi plastici in P.P. (polipropilene).

ANTE VETRO

Realizzate in vetro temperato acidato sp. 4 mm con telaio alluminio verniciato a polveri epossidiche o anodizzato fin. lucida o tutto vetro trasparente sp. 5 mm.

CASSETTONI

Dotati di telaio estraibile con guide in metallo a riciclo di sfere montate nella foratura a passo 32 mm dei fianchi. Permettono l'utilizzo di cartelle a lettura superiore da 33 cm per le larghezze da cm 80 e da 33 e 38 cm per le larghezze da cm 100.

SERRATURE

Sulle ante dei mobili sono applicate serrature con chiusura sul top per le h. 760, 836 e 1120, e ad asta rotante per le h. 1636 e 1988 mm con chiusura su top e fondo, a richiesta sulle ante vetro.

Sui cassettoni la serratura è posizionata sul primo cassettone e la chiusura è multipla; nell'anta a serrandina è applicata sul montante scorrevole. Le chiavi in dotazione sono piegabili.

The containers have melamine body 18 mm for the sides and 10 mms for the backs. A 32 mm step double perforation is previewed for the insertion of inside equipments.

The backs inserted in open cabinet allow the use of the containers even in the centre of the room.

The elements 760, 836 and 1120 mm heights are delivered already assembled. In 1636 and 1988 mms heights these are delivered dissembled with the exception of the filing unit. Thanks to the fittings used the assemblage results simple and rapid. All the edges of tops, bottoms, doors and frontals are high thickness in conformity with 2 mm radius and, therefore, in accordance with the UNI safety norm .

SHELVES

They are made in metal painted with epoxy powder with shaped profile, predisposed hold 33 cm files.

TOP and BOTTOMS

They are of thickness 18 mm, in melamine.

In the bottoms are levelling feet adjustable from the inside.

Optional it is the employment of the plinth which is also recommended, for a great safety, in the bookstores with tambour door and is obligatory in the overlap bookstores.

DOORS

They are of thickness 18 mm, in melamine.

They have 105° opening hinges. The handles are in plastic material.

On the double doors a dust stopper is applied.

The tambour doors are made by plastic elements in P.P. (polypropylene).

GLASS DOORS

They are made in 4 mm thick tempered frosted glass with aluminium frame painted in epoxy powder or anodized shiny or all transparent glass 5 mm thick.

FILING UNITS

Equipped pull-out frame with metal guides with ball bearings fixed in the 32 mm step perforation of the sides.

They allow the use of 33 cm files for the 80 cm width and from 33 and 38 cm. for the 100 cm width.

LOCKS

On the bookcases doors of 760, 836 and 1120 mm heights the lock is blocks on the top. Whereas is of rotating action bar for the 1636 and 1988 mm heights closing on top and bottom, application on the glass door is optional.

On the filing unit the lock is positioned on the first drawer and the closing is multiple; in the tambour door is applied moving upright. The keys are folding.

Descrizioni teniche

Technical descriptions

Descriptions techniques

Les rangements ont le corps mélamine avec épaisseur de 18 mm pour les cotes latérales et 10 mm pour la partie arrière; deux perforations au pas de 32 mm sont prévues pour l'accrochage d'accessoires internes.

Grâce aux panneaux arrière appliqués exactement sur l'ouverture et au fil des joues latérales, il est possible d'utiliser ces armoires au milieu de la pièce.

Les meubles hauteurs 760, 836 et 1120 mm sont fournis pré-assemblés, alors que les meubles hauteurs 1636 et 1988 mm sont fournis démontés, à l'exception de ceux avec classeurs extractibles. Grâce au type de la quincaillerie d'assemblage employée, le montage s'avère être simple et rapide.

Tous les bords des dessus, des bases, des portes et des façades des tiroirs ont une épaisseur avec rayon de 2 mm, conformément aux normes UNI de préventions des accidents.

TABLETTES

Réalisées en métal verni à des poussières époxydes avec un profil adéquatement façonné, elles sont prédisposées pour l'accrochement de dossiers de 33 cm à lecture frontale.

DESSUS ET BASES

D'une épaisseur de 18 mm, ils sont mélaminés.

Les fonds sont équipés de pieds d'appui et de mise à niveau, réglables de l'intérieur.

Le montage du socle, qui est en option, est conseillé pour une plus grande sécurité dans les bahuts à rideaux ou à tiroirs et est obligatoire pour les bibliothèques avec réhausse.

PORTES

D'une épaisseur de 18 mm, elles sont mélaminées.

Elles sont dotées de charnières permettant une ouverture à 105°. Les poignées sont réalisées en matière plastique.

Sur les jeux de portes, il est appliqué un élément de frappe anti-poussière.

Les portes à rideaux sont en éléments plastique en P.P. (polypropylène).

PORTES VITREES

Elles sont en verre trempé acidifié d'épaisseur 4 mm avec cadre en aluminium verni à des poussières époxydes ou anodisé fin. polie ou toutes en verre transparent d'épaisseur 5 mm.

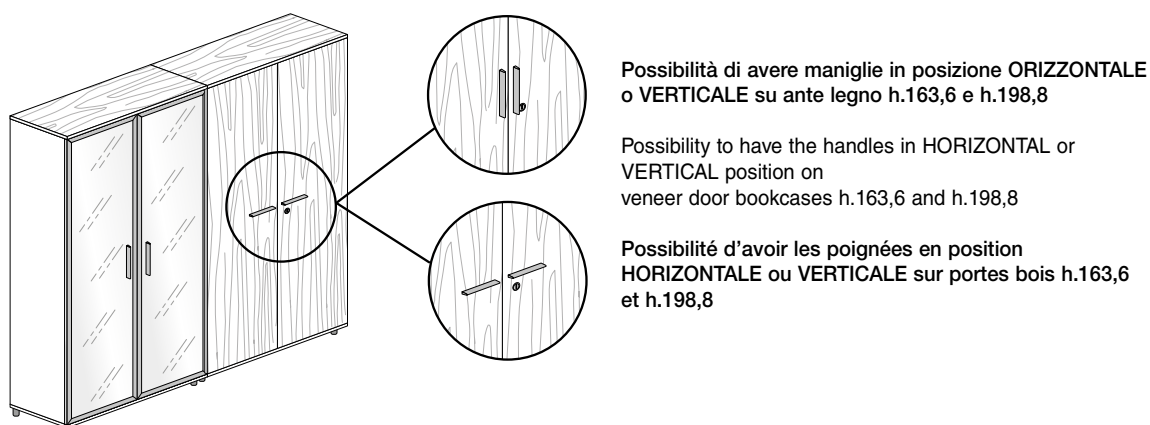

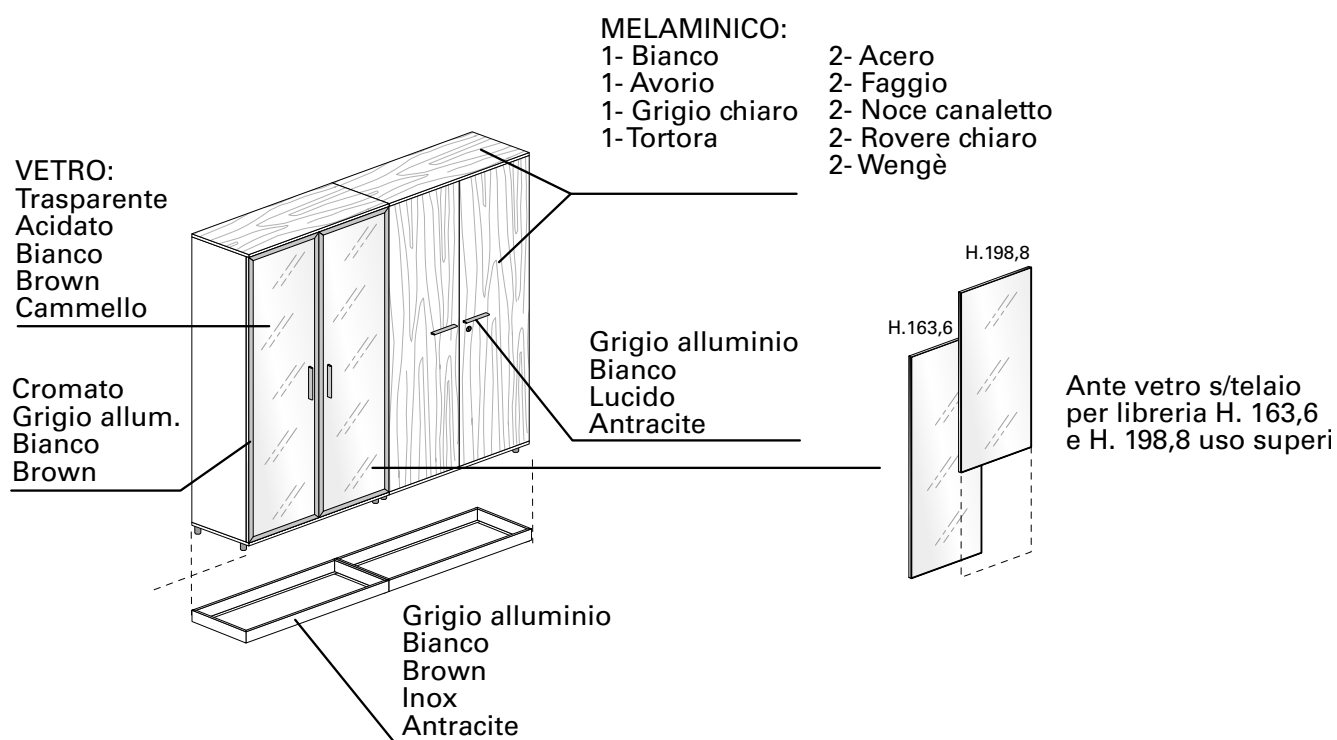

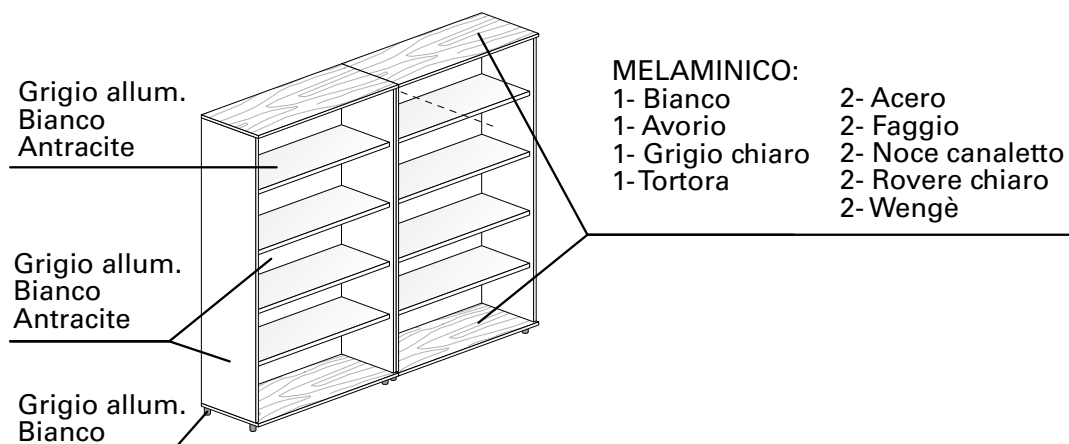

TIROIRS D.S.

Ils sont doués d'une structure extractible avec glissières métalliques à billes montées au pas de 32 mm à travers les perforations des joues latérales. Les tiroirs d'une largeur de 80 cm sont prévus pour le rangement à plat de dossiers de 33 cm. Les tiroirs d'une largeur de 100 cm acceptent également les dossiers de 33 et 38 cm

SERRURES

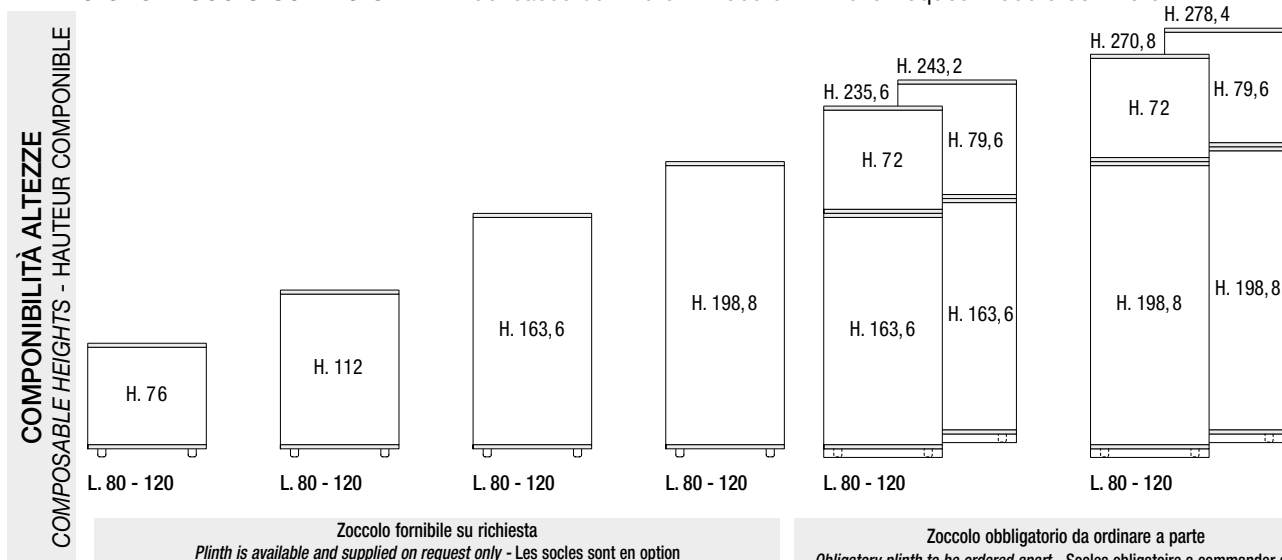

Sur les portes des meubles sont montées des serrures avec fermeture sur le dessus pour les hauteurs de 760, 836 et 1120 mm, et à tige pivotante pour les hauteurs de 1636 et 1988 mm avec fermeture sur le dessus et la base, sur demande sur les portes en verre.

La serrure, appliquée sur le premier des tiroirs, verrouille l'ensemble. Pour le rideau, elle est appliquée sur le montant coulissant. Les clés, fournies en dotation, sont repliables.

I contenitori Unit hanno le scocche realizzate in melaminico bianco con sp. 18 mm per fianchi, top e fondo, mentre le schiene hanno spessore 10 mm; è prevista una doppia foratura a passo 32 mm per l'inserimento di attrezzature interne. Le schiene sono inserite in luce a filo dei fianchi e permettono l'utilizzo dei contenitori anche a centro stanza. I mobili vengono forniti smontati, il montaggio risulta semplice e veloce.
I ripiani sono realizzati in melaminico bianco spessore 25 mm o in metallo bianco spessore 25 mm come optional.
Le ante sono in melaminico complete di serratura e montano cerniere con apertura 105°.
Le maniglie sono in materiale plastico.

Unit containers carcasses are made of 18 mm thick white melamine for sides, tops and bottoms, backs are 10 mm thick. There is a double drilling with a 32 mm pitch for the insertion of internal equipment. Backs are inserted in light, flush with the sides and allow the use of the containers also in the middle of the room.
These containers are supplied disassembled, nevertheless assembly is quick and easy.
Shelves are made of 25 mm thick white melamine or 25 mm thick white metal as an option.
Doors are in melamine and are assembled with 105 ° opening hinges and with locks; handles are in plastic material.

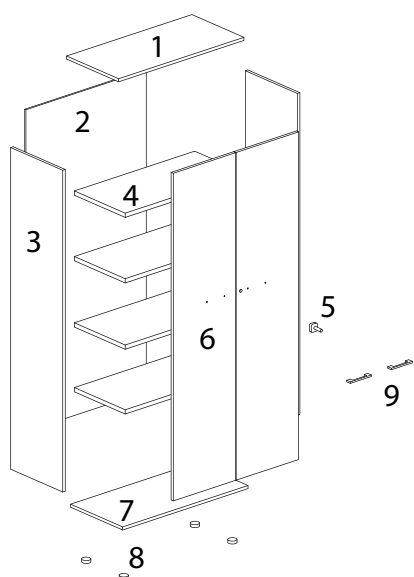

Les structures des armoires de classement Unit sont réalisées en mélamine blanche avec les flancs, les tops et les bases en épaisseur 18 mm. et les dos en épaisseur 10 mm.; c'est prévu un double perçage à pas 32 mm. pour l'insertion d'équipements internes.
Les dos sont insérés à fil des flancs en permettant l'utilisation des classements également au milieu de la pièce.
Les armoires de classements sont fournis démontés, toutefois l'assemblage est simple et vite. Les étagères sont réalisés en mélamine blanche d'ép. 25 mm ou optionnel en métal blanche d'ép. 25 mm.
Les portes sont en mélaminé avec charnières à ouverture 105° et serrures, les poignées sont en matériel plastique.

Condizioni generali di vendita

A) L'ordine Fast Delivery da inviare all'indirizzo mail: orders@archiutti.it dovrà pervenire entro il martedì alle ore 17.00 di ogni settimana, per garantire le condizioni di vendita standard a voi applicate.

B) Ogni ordine può prevedere al massimo 10 pezzi per tipologia per le scrivanie, relativi accessori e librerie, e 2 pezzi per i tavoli riunioni. Per ordini con quantitativi superiori contattare il proprio referente in azienda per verificare la disponibilità.

C) Questo Listino non è un documento contrattuale e non è vincolante per la ns. Società, non costituendo offerta. La ns. Società si riserva il diritto di apportare modifiche senza preavviso.

D) I prezzi riportati in questo Listino sono al netto di I.V.A., che verrà addebitata al Committente secondo la normativa vigente.

E) L'imballo standard è gratis. Gli imballi particolari, dovranno essere preventivamente richiesti dal cliente e verranno fatturati al costo.

F) La merce viaggia sempre a rischio e pericolo del Committente. Eventuali danni imputabili al trasporto dovranno essere segnalati nella copia del documento di trasporto da restituire firmata all'autotrasportatore.

G) Tutti i reclami dovranno essere inoltrati per iscritto alla ns. Società entro dieci giorni dalla data di ricevimento dei materiali.

H) Saranno ritenuti validi solo i pagamenti fatti a nome della ns. Società, presso il suo domicilio in Olmi di San Biagio di Callalta - Treviso.

Garanzia

La garanzia per difetti di fabbricazione e dei materiali ha validità di due anni dalla nostra data di fatturazione. Non sono coperti danni causati da urti, uso scorretto del prodotto e comportamenti non conformi alle istruzioni d'uso.

Istruzioni, precauzioni d'uso e manutenzione

- Evitare un uso improprio del prodotto (ad esempio: non appendere masse, né esercitare contro di esse una pressione impropria).
- Evitare gli urti contro superfici, soprattutto se vetrate.
- Evitare di intervenire per manutenzioni sui componenti se l'operazione non viene eseguita da una persona esperta; per ogni evenienza contattare il rivenditore o direttamente il produttore.
- Evitare che le superfici rimangano a contatto con l'acqua o con altri liquidi, anche per brevi periodi.
- I bordi di pannelli e porte non devono essere posti in prossimità a sorgenti di calore superiore a 60 °C.
- Non esporre alla luce diretta del sole (soprattutto il legno verniciato).
- Il montaggio deve essere eseguito da persona esperta, seguendo scrupolosamente le istruzioni allegate e/o richieste all'azienda.
- Accertarsi periodicamente che gli eventuali sistemi meccanici di serraggio siano opportunamente fissati.
- L'eventuale presenza di odori particolari emessi dal prodotto appena tolto dall'imballo non costituisce fonte di pericolo, e scompare con la sua esposizione in ambiente arieggiato.
- Per la pulizia delle parti in pannello derivato dal legno utilizzare esclusivamente panni morbidi imbevuti di acqua avendo cura di asciugare subito dopo la pulizia. Non utilizzare detergenti abrasivi o contenenti solventi organici e/o clorurati o sostanze ammoniacali, né utilizzare panni ruvidi o spugne abrasive.
- Per la pulizia delle parti metalliche pulire esclusivamente con acqua e un panno morbido avendo cura di asciugare le parti inumidite; non pulire la superficie quando questa supera i 25 °C ed è esposta direttamente ai raggi solari. Il contatto con acqua, senza asciugatura immediata, provoca irreversibile ossidazione del prodotto.
- Per la pulizia delle parti in plastica pulire esclusivamente con un panno morbido imbevuto di alcool denaturato diluito al 50% con acqua oppure pulire con un panno morbido imbevuto di detergente neutro diluito al 50% con acqua; asciugare subito dopo la pulizia.
- Non conservare il prodotto in ambienti con atmosfere umide o in presenza di sali.

Comunicazioni dal produttore all'acquirente

- Tutti i pannelli derivati dal legno hanno un rilascio di formaldeide nei limiti di quanto previsto per i materiali da costruzione (classe E1);
- Una volta dimesso, il prodotto o i suoi componenti non vanno dispersi nell'ambiente, ma conferiti ai sistemi pubblici di smaltimento.

General terms and conditions of sale

- A) Ready on stock orders to be sent to before Tuesday at 12 p.m. each week in order to guarantee the standard terms and conditions of sale applied to you.
- B) Each order may include a maximum of 10 pieces per type for desks, their accessories and bookcases, and 2 pieces for meeting tables. For orders with larger quantities, please contact your company representative to check availability.
- C) This Price List is not a contractual document and is not binding for our Company, as it does not constitute an offer. Our Company reserves the right to make changes without prior notice.
- D) The prices indicated in this Price List are net of VAT, which shall be charged to the Customer in accordance with the regulations in force.
- E) Standard packaging is free of charge. Special packaging shall be requested in advance by the customer and shall be charged according to cost.
- F) All complaints must be made in writing to our company within ten days of receipt of the materials.
- G) Only payments made in the name of our Company, at its address in Olmi di San Biagio di Callalta - Treviso, shall be considered valid.

Warranty

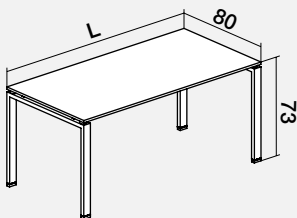

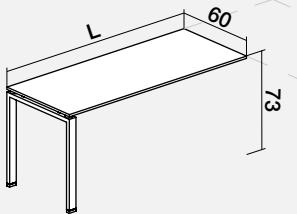

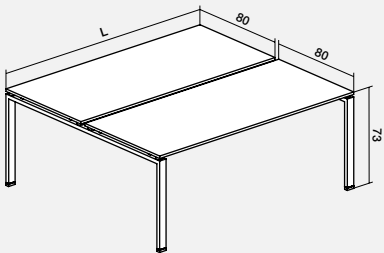

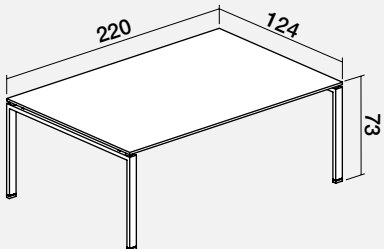

The warranty for manufacturing and material defects is valid for two years from our invoice date. Damage caused by shocks, incorrect use of the product and behaviour not in accordance with the instructions for use are not covered.

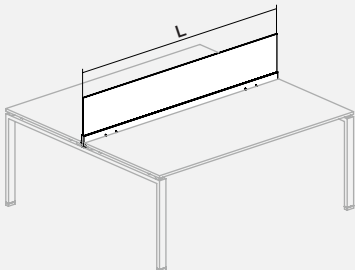

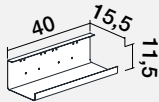

Instructions, precautions for use and maintenance

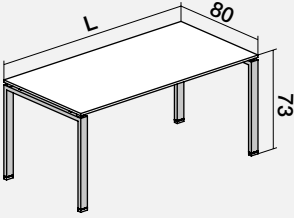

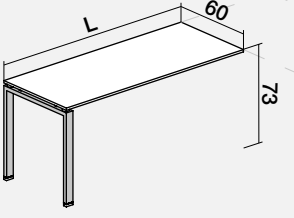

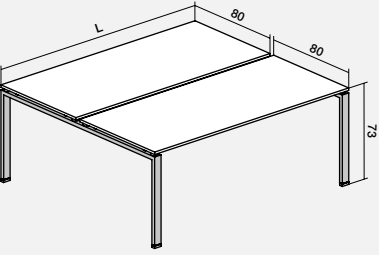

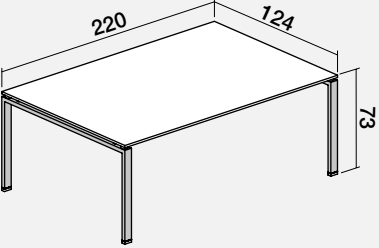

- Avoid improper use of the product (e.g. do not hang masses or apply improper pressure against them).
- Avoid maintenance work on the components if this is not carried out by an expert person; contact the retailer or the manufacturer directly for any maintenance work.
- Avoid surfaces coming into contact with water or other liquids, even for short periods.
- The edges of panels and doors must not be placed near heat sources exceeding 60 °C.
- Do not expose to direct sunlight (especially painted wood).
- Installation must be performed by an experienced person, strictly following the instructions enclosed and/or requested from the company.
- Ensure periodically that any mechanical clamping systems are properly secured.
- The possible presence of particular odours emitted by the product as soon as it is unpacked does not constitute a source of danger, and should be removed in an airy environment.
- Only use soft cloths soaked in water to clean the wood-based panel parts, taking care to dry them immediately after cleaning. Do not use abrasive detergents or detergents containing organic and/or chlorinated solvents or ammonia substances, nor use rough cloths or abrasive sponges.
- When cleaning metal parts, only clean with water and a soft cloth, taking care to dry the wet parts; do not clean the surface when it is above 25 °C and exposed to direct sunlight. Contact with water, without immediate drying, causes irreversible oxidation of the product.
- To clean plastic parts, clean only with a soft cloth soaked in 50% denatured alcohol diluted with water, or clean with a soft cloth soaked in 50% neutral detergent diluted with water; dry immediately after cleaning.
- Do not store the product in humid atmospheres or in the presence of salts.

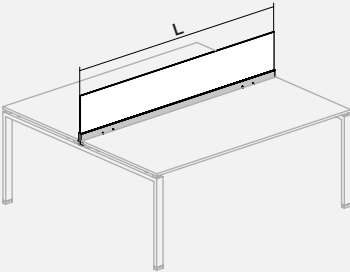

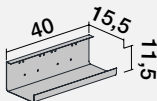

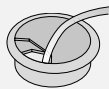

Information from the manufacturer to the purchaser

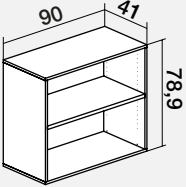

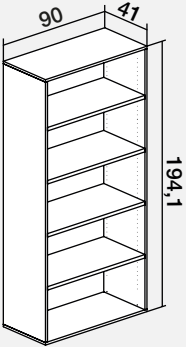

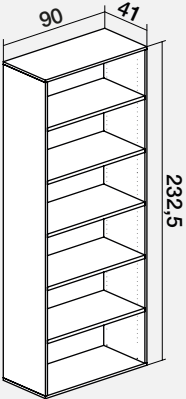

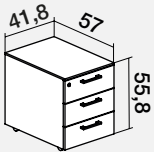

- All wood-derived panels have a formaldehyde release within the limits for building materials (class E1);
- Once discharged, the product or its components should not be disposed of in the environment, but should be taken to public disposal systems.

Condizioni Generali di Vendita

General Conditions of Sale

Conditions générales de vente

A) Questo Listino non è un documento contrattuale e non è vincolante per la ns. Società, non costituendo offerta. La ns. Società si riserva il diritto di apportare modifiche senza preavviso.	A) <i>This list is not a contract and is not binding for the Company. The Company reserves the right to modify designs and specifications without prior notifications.</i>	A) Ce tarif n'est pas un document contractuel et il n'engage pas notre Société, n'étant pas une offre. Notre Société se réserve le droit d'apporter des modifications sans préavis.
B) I prezzi riportati in questo Listino sono al netto di I.V.A., che verrà addebitata al Committente secondo la normativa vigente.	B) <i>Prices are exclusive of V.A.T. (which will be debited at the rate in force).</i>	B) Les prix s'entendent nets hors taxes (la TVA sera débitée selon le taux existant).
C) L'imballo standard in cartoni è gratis. Gli imballi particolari, dovranno essere preventivamente richiesti dal cliente e verranno fatturati al costo.	C) <i>Standard packing is free of charge. Special packings previously requested, will be charged at cost.</i>	C) L'emballage standard dans des cartons est gratuit. Un emballage spécial peut être demandé par le client avec un coût supplémentaire.
D) I termini di consegna, quando presenti, sono sempre indicativi.	D) <i>Delivery terms are always proposed, not binding.</i>	D) Les délais de livraison, si présents, sont à titre indicatif.
E) La merce viaggia sempre a rischio e pericolo del Committente. Eventuali danni imputabili al trasporto dovranno essere segnalati nella copia del documento di trasporto da restituire firmata all'autotrasportatore.	E) <i>Transport damages to be recorded on delivery note.</i>	E) La marchandise est toujours transportée aux risques du client. Tous dommages dus au transport devront être signalés et signé dans le bordereau de livraison dont un exemplaire devra rester au transporteur.
F) Tutti i reclami dovranno essere inoltrati per iscritto alla ns. Società entro dieci giorni dalla data di ricevimento dei materiali.	F) <i>All complaints must be notified to the Company within ten days of receipt of goods.</i>	F) Toutes réclamations devront être faites par écrit à notre Société dans les 10 jours qui suivent la date de réception de la marchandise.
G) Saranno ritenuti validi solo i pagamenti fatti a nome della ns. Società, presso il suo domicilio in Olmi di San Biagio di Callalta - Treviso.	G) <i>All payments must be made to the Company at their address in Olmi di San Biagio di Callalta - Treviso - Italy.</i>	G) Les règlements sont valables seulement quand ils sont faits au nom de notre Société domicilié «Olmi di San Biagio di Callalta, Treviso - Italie».

Istruzioni, precauzioni d'uso e manutenzione	Instructions, precautions on use and maintenance	Instructions, précautions de l'emploi et entretien
• Evitare un uso improprio del prodotto (ad esempio: non appendere masse, né esercitare contro di esse una pressione impropria). • Evitare gli urti contro superfici vetrate, se esistenti. • Evitare di intervenire per manutenzioni sui componenti se l'operazione non viene eseguita da una persona esperta; per ogni evenienza contattare il rivenditore o direttamente il produttore. • Evitare che le superfici rimangano a contatto con l'acqua o con altri liquidi, anche per brevi periodi. • I bordi di pannelli e porte non devono essere posti in prossimità a sorgenti di calore superiore a 60 °C. • Non esporre alla luce diretta del sole (soprattutto il legno verniciato). • Il montaggio deve essere eseguito da persona esperta, seguendo scrupolosamente le istruzioni allegate e/o richieste all'azienda. • Accertarsi periodicamente che gli eventuali sistemi meccanici di serraggio siano opportunamente fissati. • L'eventuale presenza di odori particolari emessi dal prodotto appena tolto dall'imballo non costituisce fonte di pericolo, e scompare con la sua esposizione in ambiente arieggiato.	• <i>Avoid an improper use of the product (For example: do not hang masses, neither exercise an improper pressure against it).</i> • <i>Avoid hits against glass surfaces, if existing.</i> • <i>Avoid to take part in the maintenances of the components if the operation is done by a not expert person; for any inconvenient contact directly the retailer or the producer.</i> • <i>Avoid the surfaces to remain in contact with water or other liquids, even for short periods.</i> • <i>The edges of panels and doors must not be placed in proximity of heat sources higher than 60 °C.</i> • <i>Do not expose to direct sun light (above all the painted wood).</i> • <i>The assembly must be executed by expert person, scrupulously following the attached instructions and/or demanded to the company.</i> • <i>Ensure periodically that the eventual mechanical closing systems of serration are opportunely fixed.</i> • <i>The eventual emission of particular smells emitted from the product once the packaging is removed does not constitute source of danger, and it will disappear once exposed to an aired environment.</i>	• Éviter l'emploi impropre du produit (par exemple : ne pas accrocher de masses, ni exercer contre d'elles une pression improprie). • Éviter les heurtes contre les surfaces verre, si existants. • Éviter d'intervenir sur les composantes si l'opération n'est pas suivie par une personne experte; contacter le revendeur ou directement le producteur. • Éviter que les surfaces restent à contacte avec l'eau ou avec autres liquides, même pour des brèves périodes • Les bords de panneaux et de portes ne doivent pas être placés en proximité à des sources de chaleur supérieure à 60 °C. • Ne pas exposer à la lumière du soleil (surtout bois verni). • Le montage doit être exécuté par des personnes expertes, en suivant avec soin les instructions annexes et/ou demandés à l'entreprise. • Vérifier régulièrement que les éventuels systèmes mécaniques de serrage soient opportunément fixés. • L'éventuelle émission d'odeurs particulières émises par les produits au moment du déballage ne constituent pas source de danger, et disparaissent avec l'exposition en ambient aéré.
• Per la pulizia delle parti in pannello <u>derivato dal legno</u> utilizzare esclusivamente panni morbidi imbevuti di acqua avendo cura di asciugare subito dopo la pulizia. Non utilizzare detergenti abrasivi o contenenti solventi organici e/o clorurati o sostanze ammoniacali, né utilizzare panni ruvidi o spugne abrasive. • Per la pulizia delle parti metalliche pulire esclusivamente con acqua e un panno morbido avendo cura di asciugare le parti inumidite; non pulire la superficie quando questa supera i 25 °C ed è esposta direttamente ai raggi solari. Il contatto con acqua, senza asciugatura immediata, provoca irreversibile ossidazione del prodotto. • Per la pulizia delle parti in plastica pulire esclusivamente con un panno morbido imbevuto di alcool denaturato diluito al 50% con acqua oppure pulire con un panno morbido imbevuto di detergente neutro diluito al 50% con acqua; asciugare subito dopo la pulizia.	• <i>For the cleaning of the parts <u>derived from wood</u> panels use exclusively soft water cloth and dry soon after the cleaning. Do not to use abraded detergents containing organic dissolvents and/or chloride or ammoniacal substances, neither use rough cloth or abrasive sponges.</i> • <i>For the cleaning of the metal parts clean up exclusively with water and a soft cloth and dry soon after; do not to clean up the surface when this exceeds the 25 °C and is exposed directly to the solar beams. The contact with water, without immediate drying, provokes irreversible oxidation of the product.</i> • <i>For the cleaning of the plastic parts clean up exclusively with a soft cloth with denatured alcool diluted to 50% with water, or clean up with a soft cloth with diluted neutral detergent to 50% with water; dry soon after the cleaning.</i>	• Pour le nettoyage des parties en panneau <u>dérivé du bois</u> utiliser exclusivement des tissus souples trempés d'eau en ayant du soin de sécher vite après le nettoyage. Ne pas utiliser de détergents abrasifs vous ou en contenant solvables organiques et/ou chlorurés ou substances ammoniacales, ni utiliser des tissus rudes ou des éponges abrasives; • Pour le nettoyage des parties métalliques nettoyer exclusivement avec eau et un tissu souple en ayant du soin de sécher les parties mouillées ; ne pas nettoyer la surface s'elle dépasse les 25 °C et est exposée directement aux rayons solaires. Le contacte avec l'eau, sans séchage immédiat, provoque l'irréversible oxidation du produit. • Pour le nettoyage des parties en plastique nettoyer exclusivement avec un tissu souple avec de l'alcool dénaturé dilué au 50% avec eau ou bien nettoyer avec un tissu souple avec un détergent neutre dilué au 50% avec eau ; sécher vite après le nettoyage.

Comunicazioni dal produttore all'acquirente

- Tutti i pannelli **derivati dal legno** hanno un rilascio di formaldeide nei limiti di quanto previsto per i materiali da costruzione (classe E1);
- Una volta dimesso, il prodotto o i suoi componenti non vanno dispersi nell'ambiente, ma conferiti ai sistemi pubblici di smaltimento.

Communications from the producer to the purchaser

- *All the panels which derive from the wood have a formaldehyde out let in the limits of how much previewed for the materials from construction (E1 class);*
- *Once discharged, the product or its components must not be dispersed in the atmosphere, but conferred to the public recycling systems.*

Communications du producteur à l'acheteur

- Tous les panneaux **dérivés du bois** ont un dispersion de formaldéhyde dans les limites de ce que est prévu pour les matériels de construction (classe E1);
- Une fois désaffecté le produit et ses éléments ne produit ou son composante ne doivent pas être dispersés dans l'ambient, mais conférés aux systèmes publics d'élimination.
